INTRODUCTION

The first time I set foot in the Krause Publications offices in Iola was in the winter of 1987. It was a Sunday and the offices were closed, but I had an interview scheduled and knocked on doors until a fella in work clothes opened up and let me in.

I explained I was there for an interview with the Human Resources director. He told me the HR director would not be getting there for a while, got me a cup of coffee and we talked until two other fellas in work clothes showed up. The first guy wandered off down a dark hall wishing me good luck, while the other two guys sat down and we talked for a while longer and had more coffee.

Finally a guy in a suit showed up. He wasn't the HR person, but he wanted to begin the interview. This was Clifford Mishler, then Publisher for Numismatics at KP. Among the many things he asked, two stuck out: Could I write and would I be OK with working long hours, as this was not a 40-hour-a-week job. Yes being the answer to both, Clifford seemed satisfied.

Just about then the director of HR arrived and I was handed over for a review of the benefits and policies. Clifford said that was all that was left to do, as I had already interviewed with KP founder Chet Krause, U.S. market analyst Bob Wilhite and *Standard Catalog of World Coins* editor Colin R. Bruce II.

Yep, the three fellas in work clothes were three of the seminal figures in modern world numismatics, not janitors working on a Sunday morning as I had suspected. This was a lesson to me in the tenor of the company, the work ethic and the humility of those who built the reference I had used since 1974. That third janitor, Colin R. Bruce II, passed away at the age of 77 in 2017, leaving behind a legacy of the most comprehensive world numismatic reference catalog series ever produced and leaving his coworkers with memories of crazy times and colossal achievements.

When I arrived, the entirety of the Standard Catalog of World Coins was one catalog. There was data covering coins of the entire world from 1801 to present. But things were brewing; I noticed a new book in process, *Unusual World Coins*, which Colin was working on almost every day. After that one went to the printer Colin set us all to work, at Clifford's request, compiling data on earlier coinage. First we moved back to 1750, then 1701 and finally back to 1601. Attempts were even made to move the catalog back to 1501, which we achieved for the German States and a few other areas before time and cost became too great and the project was abandoned.

The first speaker at Colin's memorial service in 2017 was his old friend, Clifford Mishler, who summed up Colin's contributions to the Standard Catalogs and our hobby very nicely:

"Bruce came on board at Krause Publications in 1974 and spearheaded publication of the third edition in 1975 as its editor. He was the lead cataloger and editor of all subsequent editions published annually through the 35th published in 2007, during which time it expanded from a single volume reference of about 1000 pages, to a massive five-volume set comprising a combined 6000-plus pages, covering all issues from the early 17th century to the early 21st century.

"Bruce similarly served as the lead cataloger and founding editor of the *Standard Catalog of World Paper Money* (Pick), the first edition of which appeared in 1975, and of the ongoing editions that appeared prior to his retirement. That original 720-page reference grew to become a three-volume set – dedicated to General Issues, Modern Issues, and Specialized Issues – that embraced some 4000 total pages.

"Colin was, in my opinion, in a global sense, the most outstanding numismatic cataloger of his era," Clifford concluded.

I have heard many stories about Colin from his early years with the company: his very late and chaotic arrival after accepting a job offer as editor; his essential corrections to those earliest Standard Catalogs in the areas of India and later China; his eccentric communications and unusual style. Colin retired in 2008, but he never really left. I often smile thinking about his daily office attire of bib overalls and an engineer cap; or of his pack-rat nature which convinced management to have him move his work area every few years so he would clean his desk (or at least box it all up and take it home); or his use of colorful phrases like "Let your conscience be your guide", which meant, if you are behind in your work, you better come in on the weekend; and, of course, his use of "happy trails" to mark the end of the day, a project, or a complex conversation.

I could go on, but the most important things to remember about Colin involve his persistence and ability to think large and in a structural manner. Colin was always the driving force during these years of building the Standard Catalog of World Coins series. Many people did much work and people around the world contributed solely because at the eye of the hurricane sat Colin, at a cluttered desk from which he could extract almost anything he needed to advance this lifelong project.

We all owe him a great debt and those who knew him will miss him dearly, warts and all. Happy trails my friend.

Thomas Michael,
Senior Editor & Market Analyst
Standard Catalog of World Coins

ACKNOWLEDGMENTS

Many numismatists have contributed countless changes, which have been incorporated in this edition. While all cannot be acknowledged here, special appreciation is extended to the following individuals and organizations who have exhibited a special dedication - revising and verifying historical and technical data and coin listings, reviewing market valuations and sharing digital images - for this edition.

HOW TO USE THIS CATALOG

This catalog is designed to serve the needs of both the novice and advanced collectors. It provides a comprehensive guide to world coins struck in the 17th century (1601-1700). It is arranged so that persons with a basic knowledge of world history and a casual acquaintance with coin collecting can consult it with confidence and ease. The following explanations summarize the general practices used in preparing the catalog listings. However, because of specialized requirements, which may vary by country and political era within a country, these should not be considered ironclad.

ARRANGEMENT

Countries are arranged alphabetically. Political changes within a country are arranged chronologically. In countries where Rulers are the single most significant political entity a chronological arrangement by Ruler has been employed. Distinctive sub-geographic regions are listed alphabetically following the countries main listings. A few exceptions to these rules may exist. Refer to the Country Index.

Diverse coinage types relating to fabrication methods, revaluations, denomination systems, non-circulating categories and such have been identified, separated and arranged in logical fashion. Chronological arrangement is employed for most circulating coinage, i.e., Hammered coinage will normally precede Milled coinage, monetary reforms will flow in order of their institution. Non-circulating types such as Essais, Pieforts, Patterns and Trial Strikes will follow the main listings.

Within a coinage type coins will be listed by denomination, from smallest to largest. Numbered types within a denomination will be ordered by their first date of issue.

IDENTIFICATION

The most important step in the identification of a coin is the determination of the nation of origin. This is generally easily accomplished where English-speaking lands are concerned, however, use of the country index is sometimes required. The coins of Great Britain provide an interesting challenge. For hundreds of years the only indication of the country of origin was in the abbreviated Latin legends. In recent times there have been occasions when there has been no indication of origin. Only through the familiarity of the monarchical portraits, symbols and legends or indication of currency system are they identifiable.

The coins of many countries beyond the English-language realm, such as those of French, Italian or Spanish heritage, are also quite easy to identify through reference to their legends, which appear in the national languages based on Western alphabets. In many instances the name is spelled exactly the same in English as in the national language, such as France; while in other cases it varies only slightly, like Italia for Italy, Belgique or Belgie for Belgium, Brasil for Brazil and Danmark for Denmark.

This is not always the case, however, as in Norge for Norway, Espana for Spain, Sverige for Sweden and Helvetia for Switzerland.

Thus it can be seen there are instances in which a little schooling in the rudiments of foreign languages can be most helpful. In general, colonial possessions of countries using the Western alphabet are similarly identifiable as they often carry portraits of their current rulers, the familiar lettering, sometimes in combination with a companion designation in the local language.

Collectors have the greatest difficulty with coins that do not bear legends or dates in the Western systems. These include coins bearing Cyrillic lettering, attributable to Bulgaria, Russia, the Slavic states and Mongolia, the Greek script peculiar to Greece, Crete and the Ionian Islands; The Amharic characters of Ethiopia. Dragons and sunbursts along with the distinctive word characters attribute a coin to the Oriental countries of China, Japan, Korea, Tibet, Viet Nam and their component parts.

The most difficult coins to identify are those bearing only Persian or Arabic script and its derivatives, found on the issues of nations stretching in a wide swath across North Africa and East Asia, from Morocco to Indonesia, and the Indian subcontinent coinages which surely are more confusing in their vast array of Nagari, Sanskrit, Ahom, Assamese and other local dialects found on the local issues of the Indian Princely States. Although the task of identification on the more modern issues of these lands is often eased by the added presence of Western alphabet legends, a feature sometimes adopted as early as the late 19th Century, for the earlier pieces it is often necessary for the uninitiated to laboriously seek and find.

Except for the cruder issues, however, it will be found that certain characteristics and symbols featured in addition to the predominant legends are typical on coins from a given country or group of countries. The toughra monogram, for instance, occurs on some of the coins of Afghanistan, Egypt, the Sudan, Pakistan, Turkey and other areas of the late Ottoman Empire. A predominant design feature on the coins of Nepal is the trident; while neighboring Tibet features a lotus blossom or lion on many of their issues.

To assist in identification of the more difficult coins, we have assembled the Instant Identifier section presented on the following pages designed to provide a point of beginning for collectors by allowing them to compare unidentified coins with photographic details from typical issues.

We also suggest reference to the comprehensive Country Index.

DENOMINATIONS

The second basic consideration to be met in the attribution of a coin is the determination of denomination. Since denominations are usually expressed in numeric, rather than word form on a coin, this is usually quite easily accomplished on coins from nations, which use Western numerals, except in those instances where issues are devoid of any mention of face value, and denomination must be attributed by size, metallic composition or weight. Coins listed in this volume are generally illustrated in actual size. Where size is critical to proper attribution, the coin's millimeter size is indicated.

The sphere of countries stretching from North Africa through the Orient, on which numeric symbols generally unfamiliar to Westerners are employed, often provide the collector with a much greater challenge. This is particularly true on nearly all pre-20th Century issues. On some of the more modern issues and increasingly so as the years progress, Western-style numerals usually presented in combination with the local numeric system are becoming more commonplace on these coins.

Determination of a coin's currency system can also be valuable in attributing the issue to its country of origin.

The included table of Standard International Numeral Systems presents charts of the basic numeric designations found on coins of non-Western origin. Although denomination numerals are

generally prominently displayed on coins, it must be remembered that these are general representations of characters, which individual coin engravers may have rendered in widely varying styles. Where numeric or script denominations designation forms peculiar to a given coin or country apply, such as the script used on some Persian (Iranian) issues. They are so indicated or illustrated in conjunction with the appropriate listings.

DATING

Coin dating is the final basic attribution consideration. Here, the problem can be more difficult because the reading of a coin date is subject not only to the vagaries of numeric styling, but to calendar variations caused by the observance of various religious eras or regal periods from country to country, or even within a country. Here again, with the exception of the sphere from North Africa through the Orient, it will be found that most countries rely on Western date numerals and Christian (AD) era reckoning, although in a few instances, coin dating has been tied to the year of a reign or government. The Vatican, for example dates its coinage according to the year of reign of the current pope, in addition to the Christian-era date.

Countries in the Arabic sphere generally date their coins to the Muslim era (AH), which commenced on July 16, 622 AD (Julian calendar), when the prophet Mohammed fled from Mecca to Medina. As their calendar is reckoned by the lunar year of 354 days, which is about three percent (precisely 2.98%) shorter than the Christian year, a formula is required to convert AH dating to its Western equivalent. To convert an AH date to the approximate AD date, subtract three percent of the AH date (round to the closest whole number) from the AH date and add 622. A chart converting all AH years from 1010 (July 2, 1601) to 1450 (May 25, 2028) may be found elsewhere in this catalog under the name Hejira Date Chart.

The Muslim calendar is not always based on the lunar year (AH), however, causing some confusion, particularly in Afghanistan and Iran, where a calendar based on the solar year (SH) was introduced around 1920. These dates can be converted to AD by simply adding 621. In 1976 the government of Iran implemented a new solar calendar based on the foundation of the Iranian monarchy in 559 BC. The first year observed on the new calendar was 2535 (MS), which commenced March 20, 1976. A reversion to the traditional SH dating standard occurred a few years later.

Several different eras of reckoning, including Christian and Muslim (AH), have been used to date coins of the Indian subcontinent. The two basic systems are the Vikrama Samvat (VS), which dates from Oct. 18, 58 BC, and the Saka era, the origin of which is reckoned from March 3, 78 AD. Dating according to both eras appears on various coins of the area.

Coins of Thailand (Siam) are found dated by three different eras. The most predominant is the Buddhist era (BE), which originated in 543 BC. Next is the Bangkok or Ratanakosindsok (RS) era, dating from 1781 AD; followed by the Chula-Sakarat (CS) era, dating from 638 AD. The latter era originated in Burma and is used on that country's coins.

Other calendars include that of the Ethiopian era (EE), which commenced seven years, eight months after AD dating; and that of the Jewish people, which commenced on Oct. 7, 3761 BC. Korea claims a legendary dating from 2333 BC, which is acknowledged in some of its coin dating. Some coin issues of the Indonesian area carry dates determined by the Javanese Aji Saka era (AS), a calendar of 354 days (100 Javanese years equal 97 Christian or Gregorian calendar years), which can be matched to AD dating by comparing it to AH dating.

The following table indicates the year dating for the various eras, which correspond to 2017 in Christian calendar reckoning, but it must be remembered that there are overlaps between the eras in some instances.

Christian era (AD)	-	2017
Muslim era (AH)	-	AH1438
Solar year (SH)	-	SH1395
Monarchic Solar era (MS)	-	MS2576
Vikrama Samvat (VS)	-	VS2074
Saka era (SE)	-	SE1939
Buddhist era (BE)	-	BE2560
Bangkok era (RS)	-	RS236
Chula-Sakarat era (CS)	-	CS1379
Ethiopian era (EE)	-	EE2010
Korean era	-	4350
Javanese Aji Saka era (AS)	-	AS1950
Fasli era (FE)	-	FE1427
Jewish era (JE)	-	JE5777
Roman	-	MMXVII

Coins of Asian origin - principally Japan, Korea, China, Turkestan and Tibet and some modern gold issues of Turkey - are generally dated to the year of the government, dynasty, reign or cyclic eras, with the dates indicated in Asian characters which usually read from right to left. In recent years, however, some dating has been according to the Christian calendar and in Western numerals. In Japan, Asian character dating was reversed to read from left to right in Showa year 23 (1948 AD).

More detailed guides to less prevalent coin dating systems, which are strictly local in nature, are presented with the appropriate listings.

Some coins carry dates according to both locally observed and Christian eras. This is particularly true in the Arabic world, where the Hejira date may be indicated in Arabic numerals and the Christian date in Western numerals, or both dates in either form.

The date actually carried on a given coin is generally cataloged here in the first column (Date). If this date is in a non-Christian dating system, such as 'AH' (Muslim), the Christian equivalent date will appear in parentheses(), for example AH1336(1917). Dates listed alone in the date column which do not actually appear on a given coin, or dates which are known, but do not appear on the coin, are generally enclosed by parentheses with 'ND' at the left, for example ND(1926).

Timing differentials between some era of reckoning, particularly the 354-day Mohammedan and 365-day Christian years, cause situations whereby coins which carry dates for both eras exist bearing two year dates from one calendar combined with a single date from another.

Countermarked Coinage is presented with both 'Countermark Date' and 'Host Coin' date for each type. Actual date representation follows the rules outlined above.

For a more detailed information on coin dating see the *Illustrated Coin Dating Guide for the Eastern World* by Albert Galloway, Krause Publications, F+W Media, 2012.

NUMBERING SYSTEM

Some catalog numbers assigned in this volume are based on established references. This practice has been observed for two reasons: First, when world coins are listed chronologically they are basically self-cataloging; second, there was no need to confuse collectors with totally new numeric designations where appropriate systems already existed. As time progressed we found many of these established systems incomplete and inadequate and have now replaced many with new KM numbers.

When numbers change appropriate cross-referencing has been provided.

Some of the coins listed in this catalog are identified or cross-referenced by numbers assigned by R.S. Yeoman (Y#), or slight adaptations thereof, in his Modern World Coins, and Current Coins of the World. For the pre-Yeoman dated issues, the numbers assigned by William D. Craig (C#) in his Coins of the World (1750-1850 period), 3rd edition, have generally been applied.

In some countries, listings are cross-referenced to Robert Friedberg's (FR#) Gold Coins of the World or Coins of the British World. Major Fred Pridmore's (P#) studies of British colonial coinage are also referenced, as are W.H. Valentine's (V#) references on the Modern Copper Coins of the Muhammadan States. Coins issued under the Chinese sphere of influence are assigned numbers from E. Kann's (K#) Illustrated Catalog of Chinese Coins and T.K. Hsu's (Su) work of similar title. In most cases, these cross-reference numbers are presented in the descriptive text for each type.

MINTAGES

Quantities minted of each date are indicated where that information is available, generally stated in millions, and usually rounded off to the nearest 10,000 pieces. On quantities of a few thousand or less, actual mintages are generally indicated. For combined mintage figures the abbreviation "Inc. Above" means Included Above, while "Inc. Below" means Included Below. "Est." beside a mintage figure indicates the number given is an estimate or mintage limit.

MINT AND PRIVY MARKS

The presence of distinctive, but frequently inconspicuously placed, mintmarks indicates the mint of issue for many of the coins listed in this catalog. An appropriate designation in the date listings notes the presence, if any, of a mint mark on a particular coin type by incorporating the letter or letters of the mint mark adjoining the date, i.e., 1883CC or 1890H.

The presence of mint and/or mintmaster's privy marks on a coin in non-letter form is indicated by incorporating the mint letter in lower case within parentheses adjoining the date; i.e. 1827(a). The corresponding mark is illustrated or identified in the introduction of the country.

In countries such as France and Mexico, where many mints may be producing like coinage in the same denomination during the same time period, divisions by mint have been employed. In these cases the mint mark may appear next to the individual date listings and/or the mint name or mint mark may be listed in the Note field of the type description.

Where listings incorporate mintmaster initials, they are always presented in capital letters separated from the date by one character space; i.e., 1850 MF. The different mintmark and mintmaster letters found on the coins of any country, state or city of issue are always shown at the beginning of listings.

METALS

Each numbered type listing will contain a description of the coins metallic content. The traditional coinage metals and their symbolic chemical abbreviations sometimes used in this catalog are:

Platinum - (PT)	Copper - (Cu)
Gold - (Au)	Brass -
Silver - (Ag)	Copper-nickel- (CN)
Billion -	Lead - (Pb)
Nickel - (Ni)	Steel -
Zinc - (Zn)	Tin - (Sn)
Bronze - (Ae)	Aluminum - (Al)

During the 18th and 19th centuries, most of the world's coins were struck of copper or bronze, silver and gold. Commencing in the early years of the 20th century, however, numerous new coinage metals, primarily non-precious metal alloys, were introduced. Gold has not been widely used for circulation coinages since World War I, although silver remained a popular coinage metal in most parts of the world until after World War II. With the disappearance of silver for circulation coinage, numerous additional compositions were introduced to coinage applications.

OFF-METAL STRIKES

Off-metal strikes previously designated by "(OMS)" which also included the wide range of error coinage struck in other than their officially authorized compositions have been incorporated into Pattern listings along with special issues, which were struck for presentation or other reasons.

Collectors of Germanic coinage may be familiar with the term "Abschlag" which quickly identifies similar types of coinage.

PRECIOUS METAL WEIGHTS

Listings of weight, fineness and actual silver (ASW), gold (AGW), platinum or palladium (APW) content of most machine-struck silver, gold, platinum and palladium coins are provided in this edition. This information will be found incorporated in each separate type listing, along with other data related to the coin.

The ASW, AGW and APW figures were determined by multiplying the gross weight of a given coin by its known or tested fineness and converting the resulting gram or grain weight to troy ounces, rounded to the nearest ten-thousandth of an ounce. A silver coin with a 24.25-gram weight and .875 fineness for example, would have a fine weight of approximately 21.2188 grams, or a .6822 ASW, a factor that can be used to accurately determine the intrinsic value for multiple examples.

The ASW, AGW or APW figure can be multiplied by the spot price of each precious metal to determine the current intrinsic value of any coin accompanied by these designations.

Coin weights are indicated in grams (abbreviated "g") along with fineness where the information is of value in differentiating between types. These weights are based on 31.103 grams per troy (scientific) ounce, as opposed to the avoirdupois (commercial) standard of 28.35 grams. Actual coin weights are generally shown in hundredths or thousands of a gram; i.e., 2.9200 g., SILVER, 0.500 oz.

WEIGHTS AND FINENESSES

As the silver and gold bullion markets have advanced and declined sharply in recent years, the fineness and total precious metal content of coins has become especially significant where bullion coins - issues which trade on the basis of their intrinsic metallic content rather than numismatic value - are concerned. In many instances, such issues have become worth more in bullion form than their nominal collector values or denominations indicate.

Establishing the weight of a coin can also be valuable for determining its denomination. Actual weight is also necessary to ascertain the specific gravity of the coin's metallic content, an important factor in determining authenticity.

TROY WEIGHT STANDARDS

24 Grains = 1 Pennyweight
480 Grains = 1 Ounce
31.103 Grams = 1 Ounce

UNIFORM WEIGHTS

15.432 Grains = 1 Gram
0.0648 Gram = 1 Grain

AVOIRDUPOIS STANDARDS

27-11/32 Grains = 11 Dram
437-1/2 Grains = 1 Ounce
28.350 Grams = 1 Ounce

HOMELAND TYPES

Homeland types are coins which colonial powers used in a colony, but do not bear that location's name. In some cases they were legal tender in the homeland, in others not. They are listed under the homeland and cross-referenced at the colony listing.

COUNTERMARKS/COUNTERSTAMPS

There is some confusion among collectors over the terms "countermark" and "counterstamp" when applied to a coin bearing an additional mark or change of design and/or denomination.

To clarify, a countermark might be considered similar to the "hall mark" applied to a piece of silverware, by which a silversmith assured the quality of the piece. In the same way, a countermark assures the quality of the coin on which it is placed, as, for example, when the royal crown of England was countermarked (punched into) on segmented Spanish reales, allowing them to circulate in commerce in the British West Indies. An additional countermark indicating the new denomination may also be encountered on these coins.

Countermarks are generally applied singularly and in most cases indiscriminately on either side of the "host" coin.

Counterstamped coins are more extensively altered. The counterstamping is done with a set of dies, rather than a hand punch. The coin being counterstamped is placed between the new dies and struck as if it were a blank planchet as found with the Manila 8 reales issue of the Philippines.

PHOTOGRAPHS

To assist the reader in coin identification, every effort has been made to use actual size images of each type listed. When available both sides are illustrated. When the coin has a diameter of 39mm or larger, usually the side required for identification of the type is illustrated. All coins up to 55mm are illustrated actual size, to the nearest 1/2mm up to 25mm, and to the nearest 1mm thereafter. Coins larger than 55mm diameter are illustrated in reduced size, with the actual size noted in the descriptive text of the listing. Where slight change in size is important to coin type identification, actual millimeter measurements are stated in the listing.

TRADE COINS

From approximately 1750-1940, a number of nations, particularly European colonial powers and commercial traders, minted trade coins to facilitate commerce with the local populace of Africa, the Arab countries, the Indian subcontinental, Southeast Asia and the Far East. Such coins generally circulated at a value based on the weight and fineness of their silver or gold content, rather than their stated denomination. Examples include the sovereigns of Great Britain and the gold ducat issues of Austria, Hungary and the Netherlands. Trade coinage will sometimes be found listed at the end of the domestic issues.

VALUATIONS

Values quoted in this catalog represent the current market and are compiled from recommendations provided and verified through various source documents and specialized consultants. It should be stressed, however, that this book is intended to serve only as an aid for evaluating coins, actual market conditions are constantly changing and additional influences, such as particularly strong local demand for certain coin series, fluctuation of international exchange rates and worldwide collection patterns must also be considered. Publication of this catalog is not intended as a solicitation by the publisher, editors or contributors to buy or sell the coins listed at the prices indicated.

All valuations are stated in U.S. dollars, based on careful assessment of the varied international collector market. Valuations for coins priced below $100.00 are generally stated in full amounts - i.e. 37.50 or 95.00 - while valuations at or above that figure are rounded off in even dollars - i.e. $125.00 is expressed 125. A comma is added to indicate thousands of dollars in value. (12,500.)

A dash (-) to the left of given values in a specific value field indicates a lack of a collectible premium. A coin in these lower grades would be worth only its face or intrinsic value. A dash (-) to the right of given values may mean very few or no examples of that grade exist for the type.

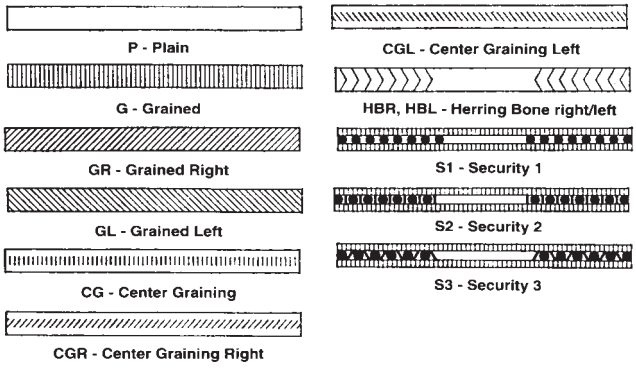
It should be noted that when particularly select uncirculated or proof-like examples of uncirculated coins become available they can be expected to command proportionately high premiums. Such examples in reference to choice Germanic Thalers are referred to as "erst schlage" or first strikes.

TOKEN COINAGE

At times local economic conditions have forced regular coinage from circulation or found mints unable to cope with the demand for coinage, giving rise to privately issued token coinage substitutes. British tokens of the late 1700s and early 1880s, and the German and French and French Colonial emergency emissions of the World War I era are examples of such tokens being freely accepted in monetary transactions over wide areas. Tokens were likewise introduced to satisfy specific restricted needs, such as the leper colony issues of Brazil, Colombia and the Philippines.

This catalog includes introductory or detailed listings with "Tn" prefixes of many token coinage issues, particularly those which enjoyed wide circulation and where the series was limited in diversity. More complex series, and those more restricted in scope of circulation are generally not listed, although a representative sample may be illustrated and a specialty reference provided.

MEDALLIC ISSUES



Medallic issues are similar to coin-type issues and can generally be identified as commemoratives produced to the country's established coinage standards but without the usual indicator of denomination. These pieces sometimes feature designs adapted from the country's regular issue or commemorative coinage, and occasionally have been issued in conjunction with related coinage issues.

Medallic issues, though bearing these similarities to coinage issues, are not coins and therefore are not listed in this catalog but can be found in the companion catalog *Unusual World Coins.*

RESTRIKES, COUNTERFEITS

Deceptive restrike and counterfeit (both contemporary and modern) examples exist of some coin issues. Where possible, the existence of restrikes is noted. Warnings are also incorporated in instances where particularly deceptive counterfeits are known to exist. Collectors who are uncertain about the authenticity of a coin held in their collection, or being offered for sale, should take the precaution of having it authenticated.

EDGE VARIETIES

CONDITIONS / GRADING

Wherever possible, coin valuations are presented in five grades of preservation. In this catalog we have adopted the use of the 70-point numerical grading system employed in the United States. For modern commemoratives, which do not circulate, only Mint State prices are sufficient. Proof issues are indicated by the prefix PF-60, PF-63 or PF-65 next to the valuation following the mintage. Coins which are proof in quality but not yet priced, have the notation of Proof next to the date and no price information. For very recent circulating coins and coins of limited value only one, two or three grade values are presented with lower grade fields containing a dash (-) value indicating no collector premium above face or intrinsic value.

There are almost no grading guides for world coins. What follows is an attempt to help bridge that gap until a detailed, illustrated guide becomes available.

In grading world coins, there are two elements to look for: 1) Overall wear, and 2) loss of design details, such as strands of hair, feathers on eagles, design elements on the coat-of-arms, etc.

The age, rarity or type of a coin should not be a consideration in grading.

Grade each coin by the weaker of the two sides. This method appears to give results most nearly consistent with the American Numismatic Association standards for U.S. coins. Split grades, i.e., F/VF for obverse and reverse, respectively, are normally no more than one grade apart. If the two sides are more than one grade apart, the series of coins probably wears differently on each side and should then be graded by the weaker side alone.

Grade a coin by the amount of overall wear and loss of design detail evident on each side of the coin. On coins with a moderately small design element (which is prone to early wear) grade by that design alone. For example, the 5-ore (KM#554) of Sweden has a crown above the monogram on which the beads on the arches show wear most clearly. So, grade by the crown alone.

For **MS-65 (Gem Brilliant Uncirculated, GemBU)** grade there will be no visible signs of wear or handling, even under a 10-power loop. Full mint luster will be present. No bag or adjustment marks will be present. Sharp rims and bold detail are characteristic of this grade.

For **MS-63 (Choice Brilliant Uncirculated, ChoiceBU)** grade there will be no visible signs of wear or handling, even under a 10-power loop. Mint luster will be present. Ideally no bags marks will be evident, light adjustment marks may be present.

For **MS-60 (Uncirculated, Unc.)** grade there will be no visible signs of wear or handling, even under a 10-power loop. Adjustment marks and bag marks may be present.

For **AU-50 (Almost Uncirculated, AU)** all details will be visible. There will be the slightest of wear only on the highest point of the coin. There will often be half or more of the original mint luster present.

On the **XF-40 (Extremely Fine, XF or EF)** coin, there will be about 95% of the original detail visible. Or, on a coin with a design with no inner detail to wear down, there will be a light wear over nearly all the coin. If a small design is used as the grading area, about 90% of the original detail will be visible. This latter rule stems from the logic that a smaller amount of detail needs to be present because a small area is being used to grade the whole coin.

The **VF-20 (Very Fine, VF)** coin will have about 75% of the original detail visible. Or, on a coin with no inner detail, there will be moderate wear over the entire coin. Corners of letters and numbers may be weak. A small grading area will have about 66% of the original detail.

For **F-12 (Fine, F)**, there will be about 50% of the original detail visible. Or, on a coin with no inner detail, there will be fairly heavy wear over all of the coin. Sides of letters will be weak. A coin which has not been cleaned will often appear as dirty or dull. A small amount of the grading area will have just about 50% of the original detail.

On the **VG-8 (Very Good, VG)** coin, there will be about 25% of the original detail visible. There will be heavy wear on all of the coin.

The **G-4 (Good, G)** coin's design will be clearly outlined but with substantial wear. Some of the larger detail may be visible. The rim may have a few weak spots of wear.

On the **AG-3** (About Good, AG) coin, there will typically be only a silhouette of a large design. The rim will be worn down into the letters if any.

Strong or weak strikes, partially weak strikes, damage, corrosion, attractive or unattractive toning, rim bumps, dipping or cleaning should be described along with the above grades. These factors affect the quality of the coin just as do wear and loss of detail, but are easier to describe.

In the case of countermarked/counterstamped coins, the condition of the host coin will have a bearing on the end valuation. The important factor in determining the grade is the condition, clarity and completeness of the countermark itself. This is in reference to countermarks/counterstamps having raised design while being struck in a depression.

Incuse countermarks cannot be graded for wear. They are graded by the clarity and completeness including the condition of the host coin which will also have more bearing on the final grade/valuation determined.

HEJIRA DATE CONVERSION CHART

HEJIRA (Hijira, Hegira), the name of the Muslim era (A.H. = Anno Hegirae) dates back to the Christian year 622 when Mohammed "fled" from Mecca, escaping to Medina to avoid persecution from the Koreish tribemen. Based on a lunar year the Muslim year is 11 days shorter.

The Democratic and Popular Republic of Algeria, a North African country fronting on the Mediterranean Sea between Tunisia and Morocco. Capital: Algiers (Alger).

Algiers, the capital and chief seaport of Algeria, was the site of Phoenician and Roman settlements before the present Moslem city was founded about 950. Nominally part of the sultanate of Tilimsan, Algiers had a large measure of independence under the amirs of its own. In 1492 the Jews and Moors who had been expelled from Spain settled in Algiers and enjoyed an increasing influence until the imposition of Turkish control in 1518. For the following three centuries, Algiers was the headquarters of the notorious Barbary pirates as Turkish control became more and more nominal.

MONETARY SYSTEM
(Until 1847)
14-1/2 Asper (Akche, Dirham Saghir) = 1 Kharub
2 Kharuba = 1 Muzuna
24 Muzuna = 3 Batlaka (Pataka) = 1 Budju

NOTE: Coin denominations are not expressed on the coins, and are best determined by size and weight. The silver Budju weighed about 13.5 g until AH1236/1821AD, when it was reduced to about 10.0 g. The fractional pieces varied in proportion to the Budju. They had secondary names, which are given in the text. In 1829 three new silver coins were introduced and Budju became Tugrali-rial, Tugrali-batlaka = 1/3 Rial = 8 Muzuna and Tugrali-nessflik = 1/2 Batlaka = 4 Muzuna. The gold Sultani was officially valued at 108 Muzuna, but varied in accordance with the market price of gold expressed in silver. It weighed 3.20-3.40 g. The Zer-i Mahbub was valued at 80 Muzuna & weighed 2.38-3.10 g.

Angola, located on the Atlantic coast of southern Africa, was home to many Bantu Kingdoms prior to Portuguese colonization in the late 15th century. The Portuguese navigator, Diogo Cão, landed at the mouth of the Congo River in 1482 and Portuguese missionaries and settlers arrived less than 10 years later in 1491. Diplomatic and social interactions with Bakongo, the largest Kingdom of the region, developed slowly over the next 50 years. From 1543-1571, conflict between the Kindoms of Bakongo and Mbundu escalated, causing Portuguese policy in Angola to evolve. In 1563 the Ngola Ndambi detained a Portuguese priest and expedition commander, Father Francisco de Gouveia and Paulo Dias respectively. Over the next eight years Portugal changed its relationship with Angola from allies, to potential colony.

Portuguese military action in Angola from 1571 to 1605 centered on unsuccessful attempts to locate the legendary silver mines of Cambambe. Once attempts to capitalize on silver were abandoned, expanding the slave trade with colonial Brazil became Portugal's primary objective. The Dutch entered the region and captured the major ports of Luanda and Benguela in 1641, signing treaties with the Mbundu and Bakongo Kingdoms and halting the supply of slaves to Brazil. Wealthy Brazilian sugar plantation owners joined forces to finance a military offensive which ousted the Dutch from Angola by 1648. Portuguese control of Angola was solidified by crushing the military and political prominence of the Kingdoms as Bakongo fell in 1665, Mbundu in 1671 and further inland, Ovimbundu in 1776.

From 1701-1800 the Portuguese Atlantic slave trade sent approximately 2.2 million Africans to the Americas. Luanda was the primary base for military raids into the interior of Angola and central seaport for transport of slaves across the Atlantic. Both Luanda and Benguela operated as transfer points for Portuguese Atlantic slave trading and it is estimated that over the full period of human exploitation in the region 3 to 4 million people were enslaved. In 1863 Portugal legally outlawed slave trading, but enforcement was lax until the British Royal Navy took action to finally end slave trading in Angola in 1865.

For the next hundred years Portugal retained Angola as a colony, capitalizing on some of its most easily accessible natural resources. Trading in ivory, beeswax and rubber came first, followed by river diamond mining beginning in 1917. Portuguese migration to Angola, though politically encouraged, never flourished with less than 10,000 Portuguese residents recorded in 1900. Diamond mining grew and Angola's gem quality diamond production remained the primary export until post World War II when agricultural attempts in cotton and coffee were encouraged. Oil became Angola's largest export commodity in 1973, but diamond mining continued to grow after Angola's independence.

The entire period of Portuguese colonization in Angola from 1648-1975 was marked by military actions and exploitation of both the population and natural resources of the region. Very little infrastructure development left an independent Angola once again at odds with itself and civil war between rival military factions continued from 1975 to 2002.

Presently the Republic of Armenia (formerly Armenian S.S.R.) is bounded in the north by Georgia, to the east by Azerbaijan and to the south and west by Turkey and Iran (Persia). It has an area of 11,506 sq. mi. (29,800 sq. km).

The earliest history of Armenia records continuous struggles with expanding Babylonia and later Assyria. In the sixth century B.C. it was called Armina. Later under the Persian empire it enjoyed the position of a vassal state. Conquered by Macedonia, it later defeated the Seleucids and Greater Armenia was founded under the Artaxis dynasty. Christianity was established in 303 A.D. which led to religious wars with the Persians and Romans who divided it into two zones of influence. The Arabs succeeded the Persian Empire of the Sassanids which later allowed the Armenian princes to conclude a treaty in 653 A.D. In 862 A.D. Ashot V was recognized as the "prince of princes" and established a throne recognized by Baghdad and Constantinople in 886 A.D. The Seljuks overran the whole country and united with Kurdistan which eventually ran the new government. In 1240 A.D. onward the Mongols occupied almost all of western Asia until their downfall in 1375 A.D. when various Kurdish, Armenian and Turkoman independent principalities arose. After the defeat of the Persians in 1516 A.D. the Ottoman Turks gradually took control over a period of some 40 years, with Kurdish tribes settling within Armenian lands. In 1605 A.D. the Persians moved thousands of Armenians as far as India developing prosperous colonies. Persia and the Ottoman Turks were again at war, with the Ottomans once again prevailing. The Ottomans later gave absolute civil authority to a Christian bishop allowing them free enjoyment of their religion and traditions.

Presently the Republic of Austria, a parliamentary democracy located in mountainous central Europe, has an area of 32,374 sq. mi. (83,850 sq. km.) and a population of 8.08 million. Capital: Wien (Vienna). Austria is primarily an industrial country. Machinery, iron, steel, textiles, yarns and timber are exported.

The territories later to be known as Austria were overrun in pre-Roman times by various tribes, including the Celts. Upon the fall of the Roman Empire, the country became a margravate of Charlemagne's Empire. Premysl II of Otaker, King of Bohemia, gained possession in 1252, only to lose the territory to Rudolf of Habsburg in 1276. Thereafter, until World War I, the story of

Austria was conducted by the ruling Habsburgs.

During the 17th century, Austrian coinage reflected the geo-political strife of three wars. From 1618-1648, the Thirty Years' War between northern Protestants and southern Catholics produced low quality, "kipperwhipper" strikes of 12, 24, 30, 60, 75 and 150 Kreuzer. Later, during the Austrian-Turkish War, 1660-1664, coinages used to maintain soldier's salaries also reported the steady division of Hungarian territories. Finally, between 1683 and 1699, during the second Austrian-Turkish conflict, new issues of 3, 6 and 15 Kreuzers were struck, being necessary to help defray mounting expenses of the war effort.

RULERS
Rudolf II, 1576-1612
Matthias II, 1612-1619
Ferdinand II, 1619-1637
Ferdinand III, 1637-1657
Leopold I, 1657-1705

MINT IDENTIFICATION

To aid in determining an Austrian (Habsburg) coin's mint it is necessary to first check the coat of arms. In some cases the coat of arms will dominate the reverse. The Hungarian Madonna and child is a prime example. On more traditional Austrian design types the provincial coat of arms will be the only one on the imperial eagle's breast. When a more complicated coat of arms is used the provincial arms will usually be found in the center or at the top center usually overlapping neighboring arms.

Legend endings frequently reflect the various provincial coats of arms. Sometimes mint marks appear on coins such as the letter W for Breslau. Mintmaster's and mint officials' initials or symbols also appear and can be used to confirm the mint identity.

The following pages will present the mint name, illustrate or describe the provincial coats of arms, legend endings, mint marks, and mint officials' initials or symbols with which the mint identity can be determined.

AUGSBURG MINT
BRUNN MINT
(Brno)
(in Moravia)

MINT MARKS

Privy Mark	Description	Date
Ⓑ	Circled B	1624, 1625, 1627

MINT OFFICIALS' INITIALS

Initials	Dates	Names
GR	1621-23	Georg Ritter
HG	1624	Hans Gebhart
BZ	1624	B. Zwirner

MINT OFFICIALS' PRIVY MARKS

Privy Mark	Description	Date	Names
CW(c) -	CW monogram	1623-27	Christoph Wonsiedler
(cs) -	Crenalated square	1621-23	Cons. De Witte
(ct) -	Circle in triangle or triangle in circle	1646-48	Johann Jan Conrad Richthausen
(d)	Dot in center of diamond		
(h) -	Conjoined HP, metal hook	1619-20	Peter Hema
		1619-22	Hans Peca
(o)	Dot in triangle		
(s)	Snowflake		

FÜRTH MINT
(in Bavaria)

Coat of arms, like Vienna, fills the lower left quarter of the shield on the imperial eagle's breast.

MINT OFFICIALS' INITIALS

Initials	Date	Name
CS	1630	Conrad Stutz, in Nurnberg

GRAZ MINT
(in Province of Styria)

Coat of arms, rampant panther similar to Bohemian lion, usually found on imperial eagle's breast. Legend usually ends: STY, STYR or STYRIAE.

MINT MARKS
D, G, GR - Graz (Styria)

MINT OFFICIALS' INITIALS

Initials	Dates	Names
CH, SH	1665-66	Sebastian Haydt
HCK	1657-65	Hans Caspar Khendimayer
IA	1694-1705	Johann Jacob Aigmann
IAN	1670-1694	Johann Anton Nowak
IGH	1671-73	-
IGW, IW	1671	Johann Georg Weiss
L	1660-82	-
MAX K		Maximillian Konig, engraver

AUERSPERG

The Auersperg princes were princes of estates in Austrian Carniola, a former duchy with estates in Laibach and Silesia, a former province in southwestern Poland and Swabia, one of the stem-duchies of medieval Germany. They were elevated to princely rank in 1653, and the following year were made dukes of Muensterberg, which they ultimately sold to Prussia.

RULER
Johann Weikard, 1615-1677

MONETARY SYSTEM
120 Kreuzer = 1 Convention Thaler

EGGENBERG

An old Styrian family first mentioned in 1448. Two members made free barons in 1598 after service in the Dutch wars. Made a prince in 1623. Bought Italian properties of Aquileia and Gradiska in 1641. Passed to Herberstein in 1774 after death of the line.

OLMÜTZ

In Moravia

Olmutz (Olomouc), a town in the eastern part of the Czech Republic which was, until 1640, the recognized capital of Moravia, obtained the right to mint coinage in 1144, but exercised it sparingly until the 17th century, when it became an archbishopric.

ORTENBURG

A district of Carinthia with its own counts from c.1100 to 1421. Eventually it became property of the emperor who assigned it to a Spanish noble in 1524. This line died out in 1640. The Widmanns, an Italian family, ruled from 1640 to 1662 and produced the only coins. In 1662 Ortenburg passed to Porcia and was finally mediatized to Austria in 1805.

RULER

SALZBURG

A town on the Austro-Bavarian frontier which grew up around a monastery and bishopric that was founded circa 700. It was raised to the rank of archbishopric in 798. In 1803 Salzburg was secularized and given to an archduke of Austria. In 1803 it was annexed to Austria but years later passed to Bavaria, returning to Austria in 1813. It became a crownland in 1849, remaining so until becoming part of the Austrian Republic in 1918.

COUNTERMARKED COINAGE

1681

Prior to 1681 the confusion of the various types of Germanic coinage continued, particularly in regards to the many debased coins in circulation. In order to save his country from greater difficulties, Max Gandolph Kuenburg in 1681, ordered that all thalers and half thalers in circulation be countermarked with the Arms of the See including the date 1681. As the charge for this was one kreuzer for each thaler and two pfennige for each half thaler, the desired result was not attained. Partly through fear of innovation, partly through meanness, very few coins were handed in and all these countermarked pieces are comparitively rare.

SINZENDORF

A town on the Austro-Bavarian frontier which grew up around a monastery and bishopric that was founded circa 700. It was raised to the rank of archbishopric in 798. In 1803 Salzburg was secularized and given to an archduke of Austria. In 1803 it was annexed to Austria but years later passed to Bavaria, returning to Austria in 1813. It became a crownland in 1849, remaining so until becoming part of the Austrian Republic in 1918.

TRAUTSON

An old Tyrolean family that traced its lineage back to 1134. During the reign of Paul Sixtus I (1589-1621), who was Imperial Governor of the Tyrol, the mint right was given to this house. Members of this house held high imperial offices until 1775 when the house passed to Auersperg.

TROPPAU-JAEGENDORF

Troppau was an old upper Silesian duchy with its capital in the town of the same name located 90 miles southeast of Breslau. The capital of an Upper Silesian duchy Troppau fell to Austria 1528-1614 except for a short period in the 1550's. In 1614 Count Carl of Liechtenstein was created duke of Troppau for his military services. This coinage was intended for circulation in Troppau and in Jaegendorf.

The Austrian Netherlands, which corresponds roughly to present-day Belgium, came into being on April 11, 1713, when the Treaty of Utrecht awarded the lands to Austria as part settlement following the war with Spain. It passed to France in 1795, was part of the Kingdom of Netherlands from 1815 to 1830, and became the present Belgium as the result of the revolution of 1830 against William I, Prince of Orange and King of the Netherlands.

RECKHEIM

A barony in Limburg which was raised to a county in 1624. Was in the hands of the van Lynden family and mediatized in 1803.

RULERS
Herman of Aspremont- Lynden, 1590-1603
Ernst, 1603-1636
Ferdinand, 1636-1665
Francois-Gobert and Ferdinand-Gobert of Aspremont-Lynden, 1665-1703

Ancient home of Scythian tribes and known under the Romans as Albania and to the Arabs as Arran, the country of Azerbaijan was formed at the time of its invasion by Seliuk Turks and grew into a prosperous state under Persian suzerainty. From the 16th century the country was a theatre of fighting and political rivalry between Turkey, Persia and later Russia. Baku was first annexed to Russia by Czar Peter I in 1723 and remained under Russian rule for 12 years. After the Russian retreat the whole of Azerbaijan north of the Aras River became a khanate under Persian control. Czar Alexander I, after an eight-year war with Persia, annexed it in 1813 to the Russian empire.

Situated in the western Atlantic Ocean 660 miles (1,062 km.) east of North Carolina, has an area of 20.6 sq. mi. (53 sq. km).Bermuda was discovered by Juan de Bermudez, a Spanish navigator, in about 1503. British influence dates from 1609 when a group of Virginia-bound British colonists under the command of Sir George Somers was shipwrecked on the islands for 10 months. The islands were settled in 1612 by 60 British colonists from the Virginia Colony and became a crown colony in 1684. The earliest coins issued for the island were the "Hogge Money" series of 2, 3, 6 and 12 pence, the name derived from the pig in the obverse design, a recognition of the quantity of such animals then found there. The next issue for Bermuda was the Birmingham coppers of 1793; all locally circulating coinage was demonetized in 1842, when the currency of the United Kingdom became standard. Internal autonomy was obtained by the constitution of June 8, 1968.

BRITISH COLONY

HOGGE MONEY COINAGE

Coins of great rarity, sometimes known as "Hogge" money. Undated and struck in brass (or a brass alloy), originally silver washed, the Bermuda atmospheric conditions soon removed any trace of silver. Coins with a silver trace are of very great rarity. It has been alleged that denominations of one penny and four pence exist, but these are unknown.

Bšhmen

The large and important Kingdom of Bohemia is located in Central Europe between Bavaria and Austria on the south, Saxony and Silesia on the north, Franconia and the Upper Palatinate to the west, and the Margraviate of Moravia to the east. The region was early settled by the Celtic Boii and controlled by the Czechs, a Slavic people, from the fifth century. Bohemia was at first a duchy and produced a series of rulers dating from the late 9th century. The first hereditary king was Wladislaw II, who ruled 1140-1173. During the later Middle Ages, the kingdom was acquired through marriage to various dynasties of the region, notably the Margraves of Moravia, the Electors of Brandenburg and emperors as well. By the late 15th century, the ruler was another Wladislaw II, a son of the King of Poland, and he was also the King of Hungary. His son, Ludwig, was killed in 1526 at the Battle of Mohacz, fighting against the Turks. His sister was the wife of Emperor Ferdinand I and thus, Bohemia passed to the Hapsburgs.

Bohemia, however, was an electoral monarchy and the king was chosen by the leading nobles at the capital, Prague. In most instances, the succession of one emperor to the next made electing the new emperor as king of Bohemia a mere formality. Very often, the heir apparent to the emperor was elected King of Bohemia prior to his father's passing. By the early 17th century, Protestantism had made great inroads among the Czech nobility and anti-Catholic/anti-Hapsburg sentiments were at a peak. Before Emperor Matthias died in 1619, the nobles had been forced to elect Archduke Ferdinand (II) in 1617. When two governors, appointed by Matthias, were thrown from a window of the palace in Prague in May 1618, in what became known as the Defenestration of Prague, the event precipitated a revolt by the Bohemian Estates (Die bšhmischen StŠnde). The Estates were constituted of the noble lords, the knights and the cities, who deposed Emperor Ferdinand II as king and elected the Protestant Friedrich V, Count Palatine and Elector of the Rhine, in his place. Hostilities had already begun between some of the Protestant German princes and the Emperor, but the elevation of Friedrich to the Bohemian throne galvanized imperial resolve and made the new king's reign very short. Coinage was struck under the authority of firstly, the Estates, and then King Friedrich. The Hapsburgs regained Bohemia in 1620 and except for the later short reign of Karl Albrecht of Bavaria in 1741-42, continued until 1918, although it ceased to be viewed as a separate entity after the dissolution of the Holy Roman Empire by Napoleon in 1806.

EGER

The town of Eger (Czech – Cheb) is located on the Ohre River, 86 miles (144 kilometers) west of Prague, and gave its name to the region surrounding it. The district was first mentioned in 870 as part of the margraviate of East Franconia. Ludwig the Bavarian, in order to procure the imperial throne, pledged Eger to the Bohemian crown for 20,000 silver marks in 1314 (reigned as Ludwig III, 1314-47). Emperor Karl IV of Bohemia (1347-78) allowed the town to begin issuing coins in 1349. Eger also struck a number of coins in the early 16th century and again just before and during the Thirty Years' War. The town was the site of the murder of the imperial general Wallenstein on 25 February 1634 (see Friedland). A few siege coins were struck in Eger in 1743 during the War of the Austrian Succession.

ARMS

2-fold divided horizontally, upper field has upper half of an eagle with spread wings, the lower field is filled with a cross-hatch pattern.

GLATZ

The origins of the lordship of Glatz, which was centered on the town of the same name, present-day Klodzko in southern Poland, 48 miles (80 kilometers) south of Wroclaw (Breslau), follow the fortunes of the early dukes of Lower Silesia (Niederschlesien). Boleslaw I of Schweidnitz inherited Glatz in 1290, but his son Boleslaw II of MŸnsterberg sold the lordship to Bohemia in 1322. Georg Podiebrad von Kunstadt, King of Bohemia 1458-1471, divided various territories among his sons and Heinrich I (1492-1498) received Glatz as part of his inheritance. In the first year of Heinrich's rule, Emperor Friedrich III (1440-93) raised Glatz to a countship. Heinrich's son, Karl I (1498-1536) sold Glatz to Ulrich, Count of Hardeck. From that point onwards, Glatz passed from one family to another, eventually becoming part of the Habsburg possessions in Silesia. It was taken, along with much of Silesia, by Friedrich II the Great in 1740 and the following years of war between Austria and Prussia.

RULERS
Albrecht, Herzog von Bayern,
To Austria 1567-1623
Georg Friedrich, Graf von Hardeck, ca. 1613
Karl, Erzherzog von Österreich, 1623-1628
To Austria 1628-1740

MINT OFFICIALS' INITIALS

LOBKOWITZ-STERNSTEIN

The Bohemian lords of Lobkowitz had long distinguished themselves in the service of the Holy Roman Empire. For his role on the side of the emperor in the opening phase of the Thirty Years' War, Dzenko Adalbert was given the countship of Sternstein in Upper Bavaria in 1623 and raised to the rank of Prince of the Empire. The lands in Bavaria were mediatized in 1805.

ROSENBERG

The counts of Rosenberg in Bohemia trace their origins back to the lords of Krumlau in the second half of the 12th century. Two lines were established early, but only the elder branch in Krumlau issued coins. In 1592, Count Wilhelm was raised to the rank of prince and awarded the right to strike coins. The line came to an end in 1611 and title passed to the Habsburgs until 1622, then to Eggenberg until 1719 and finally to Schwarzenberg from that year. The younger branch was raised to Count of the Empire in 1648 and then prince in 1790. The various territories of Rosenberg were mediatized during the Napoleonic Empire. All coinage of Rosenberg was produced at the Reichenstein mint in Silesia.

SCHLICK

Heinrich Schlick was the Bürgermeister (mayor) of Lazan in western Bohemia, but owned land in Passaun (Bassano in Italy, north of Vicenza and Padua) and Weisskirchen (at that time, Ujvár in Hungary, now in Romania) 45 miles (75 kilometers) east of Belgrade. Heinrich was given a patent for bearing a coat of arms by Emperor Sigismund (1410-37) in 1416. His son, Caspar (1436-49), was given the title of Count of Bassano in 1437. Therefore, Schlick was always included as the family name, but the title was Count of Passaun and Weisskirchen. The count obtained the mint right in 1489 and began coining silver from the mines of Joachimsthal and Michaelsburg about 1517. The large Guldengroschen struck from the mined silver came to be called a Joachimsthaler, later shorted to "Thaler", the origin of the "dollar" in English. The mint right was confiscated by the Bohemian crown in 1528 and Joachimsthal was also made a royal mint in 1545. The mint right was restored to the family in 1626. The last coins of Schlick were struck in the 1760's and by the dissolution of the Holy Roman Empire by Napoleon in 1806 the mint right was forfeited. The line of counts continued well into the 19th century, however.

RULERS
Georg Ernst, 1547-1612
Heinrich IV, 1612-1650
Franz Ernst, 1650-1675Franz Josef, 1675-1740
Leopold Josef, 1675-1723

ARMS
Schlick – 3 annulets divided by inverted 'V', 2 annulets to left and right of point, third lower inside the inverted figure. Passaun (Bassano) – 2 rampant panthers facing each other and holding crenelated tower between them. This is usually the central shield of the family's manifold arms.Weisskirchen – lion rampant left holding church model in left front paw.

Bolivia, a landlocked country in west central South America, has an area of 424,165 sq. mi. (1,098,580 sq. km.).

Much of present day Bolivia was first dominated by the Tiahuanaco Culture ca.400 BC. It had in turn been incorporated into the Inca Empire by 1440AD prior to the arrival of the Spanish, in 1535, who reduced the Indian population to virtual slavery. When Joseph Napoleon was placed upon the throne of occupied Spain in 1809, a fervor of revolutionary activity quickened throughout Alto Peru - culminating in the 1809 Proclamation of Liberty. Sixteen bloody years of struggle ensued before the republic, named for the famed liberator Simon Bolivar, was established on August 6, 1825. Since then Bolivia has survived more than 16 constitutions, 78 Presidents, 3 military juntas and over 160 revolutions.

The Imperial City of Potosi, founded by Villarroel in 1546, was established in the midst of what is estimated to have been the world's richest silver mines (having produced in excess of 2 billion dollars worth of silver).

The first mint, early in 1574, used equipment brought over from Lima. Before that it had been used at La Plata where the operation failed. The oldest type was a cob with the Hapsburg arms on the obverse and cross with quartered castles and lions on the reverse. To the heraldic right of the shield (at the left as one faces it) is a "p" and, under it, the assayer's initial, although in some early examples the "P" and assayer can appear to the right of the shield. While production at the "Casa de Moneda" was enormous, the quality of the coinage was at times so poor that some 50 were condemned to death by their superiors.

Therefore, by royal decree of February 17, 1651, the design was changed to the quartered castles and lions for the obverse and two crowned pillars of Hercules floating above the waves of the sea for the reverse. A new transitional series was introduced in 1651-1652 followed by a new standard design in 1652 and as the last cob type continued on for several years along with the milled pillars and bust pieces from 1767 through 1773. In the final years under Charles III the planchet is compact and dumpy, very irregular and of poor style, contrasting sharply with their counterpart denominations of the pillar and bust types.

Rarely, and at very high prices, we may be offered almost perfectly round cobs, with the dies well-centered, showing the legend and date completely. These have gained importance in the last decades and are known as "royal" or "presentation" pieces. Every year a few of these specimens were coined, using dies in excellent condition and a specially prepared round planchet, to prove the quality of the minting to the Viceroy or even to the King.

Most pre-decimal coinage of independent Bolivia carries the assayers' initials on the reverse near the rim to the left of the date, in 4 to 5 o'clock position. The mint mark or name appears in the 7 to 8 o'clock area.

RULER
Spanish until 1825

MINT MARKS–
PTA monogram - La Plata (Sucre)
P or PTS monogram - Potosi

ASSAYERS' INITIALS

There is little information available to establish the chronology of the assayers during the reign of Phillip II, 1555-1598, so the assayers initials are listed in alphabetical order. Calbeto in *Compendio de las Piezas de Ocho Reales* describes a piece with A overstruck over B, indicating A was later.

Initial	Date	Name
B	1596-1605	Hernando Ballesteros
C	1613	Augustin de la Quadra (Cuadra)
C	1678-79	Manuel de Cejas
E	1651-78	Antonio de Ergueta
F	1697-1701	?
M	1616-17	Juan Munoz
O	1649-51	Juan Rodriguez de Rodas
P	1620-31	Pedro Perez de Carrion
P	1622-26, 28-29, 46-47	Luis de Peralta
P, PO	1624-26	Pedro Martin de Palencia
Q	1613-17	Augustin de la Quadra
R	191-1618	Gaspar Ruiz
R	1605-13	?
R	1645-48	Felipe Ramirez Arellano
R, RL	1591-98, 1610-13, 18-23, 27-36, 44-48	Balthasar Ramos Leceta
T	1618-23, 27-36, 44-48	Juan Ximenez de Tapia
TR	1636-48	Pedro Trevino
V	1646	Geronimo Velasquez
V, VR	1679-84	Pedro de Villar
Z	1647-49	Pedro Zambrano

SYMBOLS

Letter and Symbol	Dates	Name
(c)=	1697	Sebastian de Chavarria
(o)=	1649-51	Juan Rodrigues de Roas
(t)R	1636-40	Pedro Trevino
(tr)R=	1640-43	Pedro trevino
(tre)R=	1643-97	?

NOTE: The se names are based on data put forth by Dr. E.A. Sellschopp in Las Acunaciones de las Cecas de Lima, La Plata Y Potosi, J. Pelliceri Bru in Glosario de Maestros de Ceca y Ensayadores and archival research in the Casa Moneda Nacional de Bolivia.

COUNTERMARKED COINAGE

1651-1652

Problems with debasement of the coinage struck at Potosi in the 1620s-1640s prompted a visit by the Royal Inspector Don Francisco de Nestares Marin, under orders by King Philip IV of Spain, at the end of 1648. Upon completion of the investigation, the order was given in October of 1650 to recall all coinage minted at Potosi since 1625 and prior to the accession of Juan Rodriguez de Rodas (assayer O with dot in middle) to the post of assayer in 1649. All half, 1, and 2 Reales , as well as any 4 and 8 Reales that were found to be heavily debased, were ordered to be melted, with all 4 Reales devalued to 3 Reales and 8 Reales devalued to 6 Reales. To differentiate the good new coinage from 1649 until a completely new design could be implemented in 1652, various countermarks were applied on the 4 and 8 Reales to reflect their higher net values of 3-3/4 Reales and 7-1/2 Reales respectively. Most of these countermarks bear a crown at the top, with either an initial or monogram or symbol below, all contained within a beaded circle (most common) or simple circle (single line, no beads) or beaded pentagon (rare) or no border (rarest). It is believed that each different countermark was applied in a different location within the Spanish colonies, but it is not known which countermark corresponds to which locale

Brazil, which comprises half the continent of South America and is the only Latin American country deriving its culture and language from Portugal, has an area of 3,286,488 sq. mi. (8,511,965 sq. km.

Brazil was discovered and claimed for Portugal by Admiral Pedro Alvares Cabral in 1500. Portugal established a settlement in 1532 and proclaimed the area a royal colony in 1549. During the Napoleonic Wars, Dom Joao VI established the seat of Portuguese government in Rio de Janeiro. When he returned to Portugal, his son Dom Pedro I declared Brazil's independence on Sept. 7, 1822, and became emperor of Brazil. The Empire of Brazil was maintained until 1889 when the federal republic was established. The Federative Republic was established in 1946 by terms of a constitution drawn up by a constituent assembly. Following a coup in 1964 the armed forces retained overall control under a dictatorship until civilian government was restored on March 15, 1985. The current constitution was adopted in 1988.

In the several centuries prior to 1500 which witnessed the breakup of the Mongol Empire and the subsequent rise of smaller successor states, no single power or dynasty was able to control the vast expanses of Western and Central Asia. The region known previously as Transoxiana, the land beyond the Oxus River (modern Amu Darya), became the domain of the Shaybanids, then the Janids. The territory ruled by these dynasties had no set borders, which rather expanded and contracted as the fortunes of the rulers ebbed and flowed. At their greatest extent, the khanate took in parts of what are now northern Iran and Afghanistan, as well as part or all of modern Turkmenistan, Uzbekistan, Kazakhstan, Tadzhikistan and Kyrgyzstan. Coins are known to have been struck by virtually every ruler, but some are quite scarce owing to short reigns or the ever-changing political and economic situation.

JANID

The Janids were the successors to the Shaybanid dynasty and they maintained coinage traditions similar to those of their predecessors. Janid silver coins are almost invariably poorly struck, rarely showing either mint or date. After about AH1090/1679AD, the alloy became increasingly debased and was mostly copper after the early AH1100s/1670s AD. By contrast, the gold coins of the Janids are found to be of high quality and alloy. The original silver tanka conformed to the 4.7 gram weight inherited from the Shaybanids, but sank to below 4 grams by the end of the dynasty. Mint names, when they are visible on the silver coins, have only been recorded for Balkh, Bukhara and Samarqand.

The dates of rule given for the Janid khans are rather tentative. The standard lists in the genealogical references to not agree with the dates found on the coins in all cases.

During the rule of the last Janid, Abu'l-Ghazi Khan in the late 13th/18th century, the territory was split into three smaller principalities: Bukhara, Khiva and Khoqand, which see.

SHAYBANID

The Shaybanids, an Uzbek dynasty which ruled from Samarqand and Bukhara, derived their name from a possible genealogical connection to the early Islamic Shaybanid Arabs. Their coinage closely follows Timurid prototypes and retains the silver tanka denomination. The only gold coins produced in sufficient numbers for circulation is only found issued by 'Abd Allah II and 'Abd al-Mu'min. Only those of the former are at all common.

The earliest Shaybanid silver tankas weighted one mithqal, then reckoned as 4.78 grams. From AH913-19/1507-13AD, the tanka was 1/12 heavier and so weighted about 5.15 grams, but the mithqal weight was restored by AH924/1513AD. The mithqal fell gradually during the 10th/16th century to about 4.6 grams by the time the Janid dynasty replaced the Shaybanids.

Many of the rulers produced countermarked coins, mostly anonymously and thus not always readily assigned to an individual reign. The only listed countermarks are those which have been attributed to a ruler with any certainty.

The mint names on most Shaybanid coins are prefixed with the expression shirmard, roughly translatable as "lion-hearted." The term is not an epithet for the mint, but rather the name of the currency, just as bih bud had previously been the name of the currency of the Timurid Sultan Husayn.

Types of Shaybanid silver coins are characterized by their obverse and reverse cartouches. However, the listings here will give generic types for each reign, with various mint and date combinations noted.

The earliest known inhabitants of Ceylon, the Veddahs, were subjugated by the Sinhalese from northern India in the 6th century B.C. Sinhalese rule was maintained until 1408, after which the island was controlled by China for 30 years. The Portuguese came to Ceylon in 1505 and maintained control of the coastal area for 150 years. The Dutch supplanted them in 1658, which were in turn supplanted by the British who seized the Dutch colonies in 1796, and made them a Crown Colony in 1802.

PORTUGUESE COLONY

Portuguese ships appeared off India in 1498. By 1505 their first governor was installed and was looking forward to settlement and trade expansion, especially the latter. Through his son he made a contact with the king of Ceylon that involved the paying of tribute to the Portuguese.

All of the early trade in Ceylon used local or the home coins of Portugal. The first coins made in Ceylon were not produced until the reign of Philip II, 1598-1621. He claimed Ceylon as a possession even though the kings of Kandy ruled the interior. Coins were made intermittently until 1645. After 1642, however, most of the silver was produced at Goa.

The last Portuguese fortress fell into Dutch hands in 1655.

DUTCH COLONY

The Dutch first sighted Ceylon in 1602. They made a treaty with the king of Kandy for trading rights and the Dutch would have to expel the Portuguese. Between 1638 and 1658 the Dutch had accomplished their purpose. The Portuguese were gone from Ceylon.

As the Dutch trade with Ceylon prospered the coins in use were local coins and countermarked coins of the Portuguese colonies. It was not until sometime after 1660 that the Dutch began striking anonymous copper coins.

In the second third of the 1700's, copper duits of the Netherlands provinces were sent to the East and used widely there. The VOC monogram on these coins became a familiar sight to the merchants of the sub-continent and the East Indies.

Local coinage started again in 1783.

EMPIRE

During the reign of Wan-li (Shen Tsung), the Board of Revenue and Board of Works were ordered to produce the *Wan-li T'ung-pao* cash pieces in 1576AD. The reverses of these cash pieces include: dot, crescent, *Kung* (two types), *Cheng, T'ien, Fen, Li* and muled obverses. Subsequently, due to large scales of war and famine, military authorities, provinces, and private sources minted similar coins in large quantities, including 2, 5, and 10 cash, 1 Fen and 1 Tael pieces. It is interesting to note that even the palace eunuch produced small silver coins during later years of Wan-li.

SYCEE (INGOTS)

Prior to 1889 the general coinage issued by the Chinese government was the copper-alloy cash coin. Despite occasional short-lived experiments with silver and gold coinage, and disregarding paper money which tended to be unreliable, the government expected the people to get by solely with cash coins. This system worked well for individuals making purchases for themselves, but was unsatisfactory for trade and large business transactions, since a dollar's worth of cash coins weighed about four pounds. As a result, a private currency consisting of silver ingots, usually stamped by the firm which made them, came into use. These were the sycee ingots.

It is not known when these ingots first came into use. Some sources date them to the Yuan (Mongol) dynasty but they are certainly much older. Examples are known from as far back as the Han dynasty (206 BC - 220 AD) but prior to the Sung era (960 - 1280AD) they were used mainly for hoarding wealth. The development of commerce by the Sung dynasty, however, required the use of silver or gold to pay for large purchases. By the Mongol period (1280-1368) silver ingots and paper money had become the dominant currencies, especially for trade. The western explorers who traveled to China during this period (such as Marco Polo) mention both paper money and sycee but not a single one refers to cash coins.

During the Ming dynasty (1368-1644) trade fell off and the use of silver decreased. But toward the end of that dynasty, Dutch and British ships began a new China trade and sycee once again became common

The word sycee (pronounced "sigh - see") is a western corruption of the Chinese word hsi-szu ("fine silk") or hsi yin ("fine silver") and is first known to have appeared in the English language in the late 1600's. By the early 1700's the word appeared regularly in the records of the British East India Company. Westerners also called these ingots "boat money" or "shoe money" owing to the fact that the most common type of ingot resembles a Chinese shoe. The Chinese, however, called the ingots by a variety of names, the most common of which were yuan pao, wen-yin (fine silver) and yin-ting (silver ingot).

The ingots were cast in molds (giving them their characteristic shapes) and while the metal was still semi-liquid, the inscription was impressed. It was due to this procedure that the sides of some sycee are higher than the center. The manufacturers were usually silver firms, often referred to as lu fang's, and after the sycee was finished it was occasionally tested and marked by the kung ku (public assayer).

Sycee were not circulated as we understand it. One didn't usually carry a sycee to market and spend it. Usually the ingots were used as a means of carrying a large amount of money on trips (as we would carry $100 bills instead of $5 bills) or for storing wealth. Large transactions between merchants or banks were paid by means of crates of sycee - each containing 60 fifty tael ingots.

Sycee are known in a variety of shapes the most common of which are the shoe or boat shaped, drum shaped, and loaf shaped (rectangular or hourglass-shaped, with a generally flat surface). Other shapes include one that resembles a double headed axe (this is the oldest type known), one that is square and flat, and others that are "fancy" (in the form of fish, butterflies, leaves, etc.).

Sycee have no denominations as they were simply ingots that passed by weight. Most are in more or less standard weights, however, the most common being 1, 5, 10 and 50 taels. Other weights known include 1/10, 1/5, 1/4, 1/3, 1/2, 2/3, 72/100 (this is the weight of a dollar), 3/4, 2, 3, 4, 6, 7, 8 and 25 taels. Most of the pieces weighing less than 5 taels were used as gifts or souvenirs.

The actual weight of any given value of sycee varied considerably due to the fact that the tael was not a single weight but a general term for a wide range of local weight standards. The weight of the tael varied depending upon location and type of tael in question. For example in one town, the weight of a tael of rice, of silver and of stones may each be different. In addition, the fineness of silver also varied depending upon location and type of tael in question. It was not true, as westerners often wrote, that sycee were made of pure silver. For most purposes, a weight of 37 grams may be used for the tael.

Weights and Current Market Value of Sycee
(Weights are approximate)

1/2 Tael	17-19 grams	26.00
72/100 Tael	25-27 grams	36.00
1 Tael	35-38 grams	46.00
2 Taels	70-75 grams	70.00
3 Taels	100-140 grams	85.00
5 Taels	175-190 grams	110.00
7 Taels	240-260 grams	125.00
10 Taels	350-380 grams	250.00
25 Taels	895-925 grams	3500
50 Taels	1790-1850 grams	2000
50 Taels, square	1790-1850 grams	1600

Note: These were once found to be all circulating forgeries with 'kung' at right cut away to erh, to make a 2 cash piece; Now there are numismatic fakes being made starting with existing cash altered to make a mother cash; This will usually be a larger plain reverse piece which only needs 'erh' to be added; Above is one made from a Nurhaci large cash; No genuine 2 cash exists

SINKIANG PROVINCE

Hsinkiang, Xinjiang
"New Dominion"

An autonomous region in western China, often referred to as Chinese Turkestan. High mountains surround 2000 ft. tableland on three sides with a large desert in center of this province. Many salt lakes, mining and some farming and oil. Inhabited by early man and was referred to as the "Silk Route" to the West. Sinkiang (Xinjiang) has been historically under the control of many factions, including Genghis Khan. It became a province in 1884. China has made claim to Sinkiang (Xinjiang) for many, many years. This rule has been more nominal than actual. Sinkiang (Xinjiang) had eight imperial mints, only three of which were in operation toward the end of the reign of Kuang Hsü

MONETARY SYSTEM
2 Pul = 1 Cash
2 Cash = 5 Li
4 Cash = 10 Li = 1 Fen
25 Cash = 10 Fen = 1 Miscal = 1 Ch'ien, Mace, Tanga
10 Miscals (Mace) = 1 Liang (Tael or Sar)
20 Miscals (Tangas) = 1 Tilla

The Republic of Colombia, in the northwestern corner of South America, has an area of 440,831 sq. mi. (1,138,910 sq. km

The northern coast of present Colombia was one of the first parts of the American continent to be visited by Spanish navigators. At Darien in Panama is the site of the first permanent European settlement on the American mainland in 1510. New Granada, as Colombia was known until 1861, stemmed from the settlement of Santa Marta in 1525. New Granada was established as a Spanish colony in 1549. Independence was declared in 1810, and secured in 1819 when Simon Bolivar united Colombia, Venezuela, Panama and Ecuador as the Republic of Gran Colombia. Venezuela withdrew from the Republic in 1829; Ecuador in 1830; and Panama in 1903.

RULER
Spanish, until 1819

MINT MARKS
C, NER, NR, NRE, R, RN, S - Cartagena
B, F, FS, N, NR, S, SF - Nuevo Reino (Bogota)
A, M - Medellin (capital), Antioquia (state)
(m) - Medellin, w/o mint mark
NR – Nueva Reino
P, PN, Pn, POPAYAN - Popayan
SM – Santa Marta
caduceus - Bogota
floral spray - Popayan

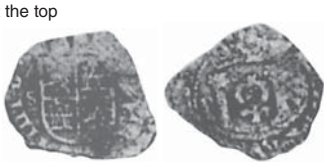
H	1622	Juan de la Hera
S	1653-55	Unknown

MONETARY SYSTEM
16 Reales = 1 Escudo



COLONIAL

COB COINAGE

Note: Values given for dated cobs are representative of average strikes with the last two digits of the date discernible. The esthetic appearance, quality of strike, and presence of date, mint mark and assayer initials all have an effect on the value of cobs.

Note: Colombian cob 1/4 Reales, which are all very rare, did not bear dates in their design, but can be dated at least approximately by virtue of the fact that the castle on the obverse and the lion on the reverse match exactly with the castles and lions in the shield of the 8 Reales struck in the same year or period.

NOTE: The cob 1/2 Reales of Colombia are distinguishable from other mints cob 1/2 Reales by virtue of the fact that the P and the S of the PHILIPPVS monogram touch at the top

KM# 1.1 1/4 REAL

2.30 g., Billon **Ruler:** Philip IV **Obv:** Arms **Rev:** Pomegranate between pillars, crown above **Note:** Struck at Santa Fe de Bogota. These coins were struck using one part 0.930 fine silver to four parts copper making a total silver fineness of 0.186g. Surviving examples are well under the regulatory weight. Prev. KM#1.

The people of Courland are of Aryan descent primarily from the German Order of Livonian Knights. They were nomadic tribesmen who settled along the Baltic prior to the 13th century. Ideally situated as a trade route and lacking a central government, they were conquered in 1561 by Poland and Sweden.

When the Livonian Order was dissolved in 1561 the then Master of the Order, Gotthard Kettler was made Duke of Courland. During the 17th century, Courland remained part of Poland, but went under Russia after Poland's division. When the Kettler line became extinct in 1737 Courland was awarded to Ernst Johann Biron, chief advisor and lover of Empress Anna of Russia. After her death he was exiled but returned in 1763. He abdicated in favor of his son Peter in 1769.

CRIMEA (KRIM)

The Crimea (ancient Tauris or Tauric Chersonese, Turkish Kirim or Krim, Russian Krym) is a peninsula of southern Russia extending into the Black Sea southwest of the Sea of Azov.

In ancient times, The Crimea was inhabited by the Goths and Scythians, was colonized by the Greeks, and ranked, in part, as a tributary state of Rome. During the succeeding centuries, the Goths, Huns, Khazars, Byzantine Greeks, Kipchak Turks, and the Tatars of Batu Khan who founded the Tatar Khanate in Russia known as the Empire of the Golden Horde overran the Crimea. After the destruction of the Golden Horde by Tamerlane (Timur) in 1395, the Crimean Taters founded an independent khanate under Haji Ghirai, which reigned first at Solkhat (Eski Kirim or Stary Krym). The Crimean khans ruled as tributary princes of the Ottoman Empire from 1478 to 1777, when they became dependent upon Russia.

2 Polushka = 1 Denga	= 2 Akche
2 Denga = 1 Kopek	= 3 Akche
5 Kopecks = 1 Kyrmis	= 15 Akche
2 Kyrmis = 1 Ishal (Tschal)	= 25 Akche

From AH1017-1169/1608-1756AD silver coins (akeches) and copper coins were struck in the names of 24 Khanate rulers. They are all very similar to the coin illustrated as C#125, usually with the obverse showing the ruler's and his father's names and the reverse with a toughra above *duribe* and the mintname.

The Kingdom of Denmark (Danmark), is located at the mouth of the Baltic Sea.

Denmark, a great power during the Viking period of the 9th-11th centuries, conducted raids on western Europe and England, and in the 11th century united England, Denmark and Norway under the rule of King Canute. Despite a struggle between the crown and the nobility (13th-14th centuries) which forced the King to grant a written constitution, Queen Margaret (Margrethe) (1387-1412) succeeded in uniting Denmark, Norway, Sweden, Finland and Greenland under the Danish crown, placing all of Scandinavia under the rule of Denmark. An unwise alliance with Napoleon contributed to the dismembering of the empire and fostered a liberal movement which succeeded in making Denmark a constitutional monarchy in 1849.

RULERS
Christian IV, 1588-1648
Frederik III, 1648-1670
Christian V, 1670-1699
Frederik IV, 1699-1730

TRADE COINAGE

Danish East India Co.
D.O.C. - Dansk Ostindisk Compagni

Originally formed in 1616 to develop trade and colonization in Asia and the East Indies under the protection of Christian IV. It was dissolved in 1634 and later reorganized in 1670 lasting until 1729 when it was closed due to its debts.

A few years later the company reorganized under the name, Danish Asiatic Company - D.A.C. Coins bearing these initials can be found listed under Tranquebar.

SANTO DOMINGO

(Hispaniola – Española)

The first coinage for circulation in Santo Domingo and other possessions in the New World was ordered by Fernando the Catholic on April 15, 1505 to be acquired from the Seville Mint. A second issue was acquired from the Burgos Mint.

RULERS

Ferdinand II & Elizabeth, 1479-1504
Charles & Johanna, 1516-1556
Philip II, 1556-1598
Philip III, 1598-1621
Philip IV, 1621-1665

MINT MARKS

B – Burgos
B-B – Burgos
S-S – Seville
SDo monogram – Santo Domingo

ASSAYERS' MARKS

F, oF – Francisco Rodriguez 1542-1578
X – Cristobal Medina 1578

SPANISH COLONIAL

COUNTERMARKED COINAGE

ca. 1651-52

The debasement of 4 and 8 Reales at the Potosi mint during 1625-1648 led to an investigation and the installation of new mint officials. The coinage that followed during 1649-1651 fell a little short of the required fineness and was recalled and given various countermarks, primarily done at Potosi.

KM# 1 7-1/2 REALES

27.07 g., 0.859 Silver 0.7475 oz. ASW **Ruler:** Philip IV **Countermark:** Crowned S*D **Note:** Countermark in beaded circle on Potosi 8 Reales, KM#19.1b.

The Arab Republic of Egypt, located on the northeastern corner of Africa, has an area of 385,229 sq. mi. (1,1001,450 sq. km.). Although Egypt is an almost rainless expanse of desert, its economy is predominantly agricultural.

Egyptian history dates back to about 3000 B.C. when the empire was established by uniting the upper and lower kingdoms. Following its 'Golden Age' (16th to 13th centuries B.C.), Egypt was conquered by Persia (525 B.C.) and Alexander the Great (332 B.C.). The Ptolemies, descended from one of Alexander's generals, ruled until the suicide of Cleopatra (30 B.C.) when Egypt became the private domain of the Roman emperor, and subsequently part of the Byzantine world. Various Muslim dynasties ruled Egypt from 641 on, including Ayyubid Sultans to 1250 and Mamluks to 1517. It was then conquered by the Ottoman Turks, interrupted by the occupation of Napoleon (1798-1801). A semi-independent dynasty was founded by Muhammad Ali in 1805 which lasted until 1952

RULER

Ottoman, until 1882

MONETARY SYSTEM

40 Paras = 1 Qirsh (Piastre)

MINT MARKS

Egyptian coins issued prior to the advent of the British Protectorate series of Sultan Hussein Kamil introduced in 1916 were very similar to Turkish coins of the same period. They can best be distinguished by the presence of the Arabic word *Misr* Egypt) on the reverse, which generally appears immediately above the Muslim accession date of the ruler, which is presented in Arabic numerals. Each coin is individually dated according to the regnal years.

INITIAL LETTERS

Letters, symbols and numerals were placed on coins during the reigns of Mustafa II (1695) until Selim III (1789). They have been observed in various positions but the most common position being over *bin* in the third row of the obverse. In Egypt these letters and others used on the Paras (Medins) above the word *duribe* on the reverse during this period.

This small and ancient Baltic state had enjoyed but two decades of independence since the 13th century until the present time. After having been conquered by the Danes, the Livonian Knights, the Teutonic Knights of Germany (who reduced the people to serfdom), the Swedes, the Poles and Russia, Estonia declared itself an independent republic on Feb. 24, 1918 but was not freed until Feb. 1919. The peace treaty was signed Feb. 2, 1920. Shortly after the start of World War II, it was again occupied by Russia and incorporated as the 16th state of the U.S.S.R Germany occupied the tiny state from 1941 to 1944, after which it was retaken by Russia. Most of the nations of the world, including the United States and Great Britain, did not recognize Estonia's incorporation into the Soviet Union.

The coinage, issued during the country's brief independence, is obsolete.

NARVA

This city was founded by the Danes in 1223. It was a center for the Livonian knights and a member of the Hanseatic League. Captured by the Swedes in 1581, and then recaptured by the Russians in 1704, it was ceded to them by the Treaty of Nystad in 1721. Narva continues to be an important industrial center.

REVAL

This old city is the present city of Tallinn in Estonia on the Gulf of Finland. It was founded by the Danes about 1219 and became an important Baltic port and a member of the Hanseatic League. It passed to Sweden in 1561 after dissolution of the Teutonic Knights. Occupied by the Russians in 1710, it was ceded to them in 1721.

France, the Gaul of ancient times, emerged from the Renaissance as a modern centralized national state which reached its zenith during the reign of Louis XIV (1643-1715) when it became an absolute monarchy and the foremost power in Europe. Although his reign marks the golden age of French culture, the domestic abuses and extravagance of Louis XIV plunged France into a series of costly wars. This, along with a system of special privileges granted the nobility and other favored groups, weakened the monarchy and brought France to bankruptcy. This laid the way for the French Revolution of 1789-99 that shook Europe and affected the whole world.

RULERS

Henry IV, 1589-1610
Louis XIII, 1610-1643
Louis XIV, 1643-1715

MINT MARKS AND PRIVY MARKS

In addition to the date and mint mark which are customary on western civilization coinage, most coins manufactured by the French Mints contain two or three small 'Marks or Differents' as the French call them. These privy marks represent the men responsible for the dies which struck the coins. One privy mark is sometimes for the Engraver General (since 1880 the title is Chief Engraver). The other privy mark is the signature of the Mint Director of each mint; another one is the different' of the local engraver. Three other marks appeared at the end of Louis XIV's reign: one for the Director General of Mints, one for the General Engineer of Mechanical edge-marking, one identifying over struck coins in 1690-1705 and in 1715-1723. Equally amazing and unique is that sometimes the local assayer's or Judge-custody's 'different' or 'secret pellet' appears. Since 1880 this privy mark has represented the office rather than the personage of both the Administration of Coins & Medals and the Mint Director, and a standard privy mark has been used (cornucopia).

For most dates these privy marks are important though minor features for advanced collectors or local researchers. During some issue dates, however, the marks changed. To be even more accurate sometimes the marks changed when the date didn't, even though it should have. These coins can be attributed to the proper mintage report only by considering the privy marks. Previous references (before G. Sobin and F. Droulers) have by and large ignored these privy marks. It is entirely possible that unattributed varieties may exist for any privy mark transition. All transition years which may have two or three varieties or combinations of privy marks have the known attribution indicated after the date (if it has been confirmed).

MONETARY SYSTEM

1641-1689
3 Livres = 1 Silver Ecu
3-1/3 Ecus = 1 Louis d'or
1 Louis d'or = 10 Livres

1690-1725
Very unstable rates period.
1 Livre = 20 Sols
1 Sol = 12 Deniers
1 Liard = 3 Deniers

ENGRAVER GENERALS' PRIVY MARKS

Mark	Desc.	Date	Name

	$	1662-65	Jacques de Soubiran

MINT DIRECTORS' PRIVY MARKS

A – Paris, Central Mint

Some modern coins struck from dies produced at the Paris Mint have the A mint mark. In the absence of a mint mark, the cornucopia privy mark serves to attribute a coin to Paris design.

Mark	Desc.	Date	Name
	Crossed palm	1630	Jean-Gabriel Fustel and Francois Ravel
	Pellet above crossed palm	1631	Francois Guibert
	Rose	1633-35	Gabriel Davin

FRENCH STATES

AIRE

(Aire-sur-la-lys, Artois)

A town in north France on the Lys, lies in a low and marshy area at the junction of 3 canals.

In the middle ages, Aire belonged to the counts of Flanders and a charter of 1188 is still extant. It was given to France by the Peace of Utrecht in 1713. In World War I, it was one of the headquarters of the British Army Expeditionary Forces.

NOTE: See also Spanish Netherlands-Artois.

CHATEAU-RENAUD

A small city in northern France near the Belgian border. Francois de Bourbon, Prince Conti acquired the city when he married Louise Marguerite of Lorraine in 1605. After his death in 1614 Louise Marguerite ruled until she ceded the property to Louis XIII of France in 1629.

RULERS
Francois and Louise Marguerite, 1605-1614
Louise Marguerite, alone 1614-1631

DOMBES

Region in eastern France near the Swiss border. Purchased by the Duke of Bourbon in 1402. Briefly in the royal domains from 1527 to 1560. Granted at that time to the Duke of Bourbon-Montpensier. The brother of Louis XIII married a Dombes heiress in 1626. After the death of their daughter, Dombes was once again annexed to France.

RULERS
Henri II de Montpensier, 1592-1608
Marie de Montpensier, 1608-1626
Gaston de Orleans and Marie, 1626-1627
Gaston de Orleans, 1627-1650
Anne Marie Louise de Orleans, 1650-1693

NEVERS & RETHEL

The county of Nevers, located in central France, and the duchy of Rethel established in 1581 located in northern France near the Belgian border were united when a Rethel heiress married the son of the Duke of Mantua, Louis Gonzaga. Their great-grandson, Charles III (1637-1665) was active as Duke of Mantua and sold Rethel and all the rest of his French possessions to Cardinal Mazarin in 1663.

RULERS

Charles of Gonzaga, 1601-1637
Charles II of Gonzaga, 1637-1659

ORANGE

Principality in south-central France, with the town of Orange being 18 miles north of Avignon. Originally became of importance during the time of Charlemagne. Passed through the houses of Baux and Chalon. In 1530 Rene of Nassau (1530-1544) became the ruler and then William the Silent (1544-1584), regarded as the founder of the Dutch Republic. William III (1650-1702) was the last ruler of Orange. William's attention was drawn to the Netherlands and in 1672 the troops of Louis XIV occupied Orange and it was incorporated into France (though actual title did not pass until 1713). William became King of England in 1689.

RULERS
Philip William, 1584-1618
Maurice, 1618-1625
Frederick Henry, 1625-1647
William IX of Nassau, 1647-1650
William Henry of Nassau, 1650-1702

MONETARY SYSTEM
3 Deniers = 1 Liard
4 Liards = 1 Sol
20 Sols = 1 Livre
6 Livres = 1 Ecu

VERDUN

(Verdun-sur-Meuse)

Town, dating to Roman times, in northeastern France 35 miles west of Metz. A bishopric founded here in the 3rd century. City destroyed during Barbarian invasions and took until the end of the 5th century to recover. Site of signing of famous treaty in 843. Part of German empire until taken by Henry II of France in 1552 and officially recognized by the Treaty of Westphalia in 1648. Pivotal locale during the Franco-Prussian War and in World War I.

Although the origin of the German Empire can be traced to the Treaty of Verdun that ceded Charlemagne's lands east of the Rhine to German Prince Louis, it was for centuries little more than a geographic expression, consisting of hundreds of effectively autonomous big and little states. Nominally the states owed their allegiance to the Holy Roman Emperor, who was also a German king, but as the Emperors exhibited less and less concern for Germany the actual power devolved on the lords of the individual states. The fragmentation of the empire climaxed with the tragic denouement of the Thirty Years War, 1618-48, which devastated much of Germany, destroyed its agriculture and medieval commercial eminence and ended the attempt of the Hapsburgs to unify Germany. Deprived of administrative capacity by a lack of resources, the imperial authority became utterly powerless. At this time Germany contained an estimated 1,800 individual states, some with a population of as little as 300. The German Empire of recent history (the creation of Bismarck) was formed on April 14, 1871, when the king of Prussia became German Emperor William I. The new empire comprised 4 kingdoms, 6 grand duchies, 12 duchies and principalities, 3 free cities and the non-autonomous province of Alsace-Lorraine. The states had the right to issue gold and silver coins of higher value than 1 Mark; coins of 1 Mark and under were general issues of the empire.

MONETARY SYSTEM
Until 1871 the Mark (Marck) was a measure of weight.
North German States until 1837
2 Heller = 1 Pfennig
8 Pfennige = 1 Mariengroschen
12 Pfennige = 1 Groschen
24 Groschen = 1 Thaler
2 Gulden = 1-1/3 Reichsthaler
1 Speciesthaler (before 1753)
South German States until 1837
8 Heller = 4 Pfennige = 1 Kreuzer
24 Kreuzer Landmunze = 20 Kreuzer
Convention Munze
120 Convention Kreuzer = 2 Convention Gulden = 1 Convention Thaler

AACHEN

(Achen, Urbs Aquensis, Aquis Grani)

This city, at the meeting point of Germany, Belgium and the Netherlands, 39 miles (65 Kilometers) west-southwest of Cologne, was founded by the Romans. It is the traditional birthplace of Charlemagne and served as the site for imperial coronations from his time until the early part of the 16th century. An imperial mint was established in Aachen in 1166 and continued in use until the early 14th century, at which time the city was raised to tree status and began producing its own coinage. The city coinage came to an end in 1798, just prior to French annexation in 1801. Prussia gained control of Aachen at the end of the Napoleonic Wars and made it part of its western provinces in 1815.

ALSACE

An old German area located in northeastern France between the Rhine River and Vosges Mountains which later became a French province.

Ruled by Rome, gradually being penetrated by the Germanic peoples. Belonged to the Holy Roman Empire 870-1648 while being united to the duchy of Swabia in 925. Later broken up into feudal principalities controlled chiefly by the Bishop of Strasbourg and Hapsburg family in the 14th century. Upper Alsace was given to Burgundy in 1469, but soon broke free. Occupied by French in Thirty Years' War and linked with France by means of Louis XIV's "Chambers of Reunion" 1680. Ceded to Germany by the Treaty of Frankfurt 1871 and under the German Empire 1871-1918. It was subject to unsuccessful attempts to Germanize between 1880-1910 and was restored to France by the Treaty of Versailles in 1919. In World War II held by Germany 1940-44; retaken by French and American armies and again restored to France.

RULERS
Rudolf II, 1603-1612
Maximilian, 1613-1618
Ferdinand II, 1619-1623
Leopold of Austria,
As Bishop of Strasbourg, 1620-
As Landgrave of Alsace, -1632

ENSISHEIM MINT

Coat of arms usually at bottom left or right section of extensive crowned arms or in legend.

ANHALT

The Principality of Anhalt in Central Germany, surrounded by Brandenburg, Brunswick and Saxony, had its origins in the same Ascanian family from which descended the margraves of Brandenburg and the dukes of Saxony. The nucleus of the Anhalt domains was the countship of Ballenstädt, whose first recorded ruler, Albrecht I, was in control there during the late 10th century. Albrecht's great-great-grandson, Albrecht III the Bear, ruled in Anhalt until 1170 and was also the margrave of Brandenburg until his death, as well as duke of Saxony until 1153. The patrimony was divided in 1170 and Albrecht III's third son, Bernhard, ruled in Anhalt and began a line of descendants, which lasted into the 20th century.

Various divisions occurred during the ensuing centuries, but the ruling princes often struck joint coinages. At the death of Georg I of Dessau and Köthen in 1474, his five surviving sons ruled together. Only two of them had any male children and they ruled separately in Dessau and Köthen until the latter fell extinct in 1566, at which time that branch reverted to Dessau. Meanwhile, Dessau had been divided in 1516 into Dessau, Plötzkau and Zerbst, but all reverted to Zerbst after a generation. One of the Zerbst princes succeeded in reuniting all the Anhalt lands in 1570 and his sons ruled jointly until the great division of 1603.

RULERS

After the division of 1603, the princes of Anhalt continued to issue joint coinage in many denominations. As some members of one generation died, their places were taken by their sons and various combinations of brothers, uncles, nephews and cousins are represented on the coins, either with their full or abbreviated names or simply as "brothers and fathers - princes of Anhalt". There are 4 distinct periods of joint coinage, 3 of which follow one upon the other and a later period separated from the first 3 by forty years.

Period I, 1603-1618

Johann Georg I von Dessau
Christian I von Bernburg
Augustus von Plötzkau
Rudolf von Zerbst
Ludwig von Köthen

Period II, 1618-1621

Christian I von Bernburg
Augustus von Plötzkau
Rudolf von Zerbst
Ludwig von Köthen
Johann Kasimir von Dessau
Georg Aribert von Dessau

Period III, 1621-1630

Christian I von Bernburg
Augustus von Plötzkau
Ludwig von Köthen
Johann Kasimir von Dessau
Georg Aribert von Dessau
Johann von Zerbst

Period IV, 1670-1693

Johann Georg II von Dessau (d.1693)
Victor Amadeus von Bernburg (d.1718)
Wilhelm von Harzgerode (d.1709)
Carl Wilhelm von Zerbst (d.1718)
Emanuel Lebrecht von Köthen (d. 1704)

ARMS

Anhalt – two-fold divided vertically, ½ eagle on left, 8 (or more) horizontal bars on right, alternately shaded, sometimes with opened crown laid across diagonally (ducal Saxony). The two sides are often reversed in early issues.

Ascanian dynasty – crowned bear standing (early), crowned bear on wall (later).

Aschersleben – checkerboard.

ANHALT-BERNBURG

Located in north-central Germany. Appeared as part of the patrimony of Albrecht the Bear of Brandenburg in 1170. Bracteates were first made in the 12th century. It was originally in the inheritance of Heinrich the Fat in 1252 and became extinct in 1468. The division of 1603, among the sons of Joachim Ernst, revitalized Anhalt-Bernburg. Bernburg passed to Dessau after the death of Alexander Carl in 1863.

ANHALT-DESSAU

Dessau was part of the 1252 division that included Zerbst and Cothen. In 1396 Zerbst divided into Zerbst and Dessau. In 1508 Zerbst was absorbed into Dessau. Dessau was given to the eldest son of Joachim Ernst in the division of 1603. As other lines became extinct, they fell to Dessau, which united all branches in 1863.

ANHALT-KÖTHEN

Köthen has a checkered history after the patrimony of Heinrich the Fat in 1252. It was often ruled with other segments of the House of Anhalt. Founded as a separate line in 1603, became extinct in 1665 and passed to Plötzkau which changed the name to Köthen. It passed to Dessau after the death of Heinrich in 1847.

ANHALT-ZERBST

Zerbst was one of the major parts of the division of 1252. It was divided into Zerbst and Dessau in 1396 and absorbed Bernburg in 1486. Zerbst ceded to Dessau in 1508 and was given to the 4th son of Joachim Ernst in the division of 1603. It became extinct in 1793 and was divided between Dessau, Bernburg and Cothen.

ANHOLT

A town in Westphalia, Anholt is 7 miles (12km) west of Bocholt and very near the border with the Netherlands. It had early been the seat of a lordship, later a county, which passed into the possession of the Bronkhorst-Batenburg dynasty. A few coins were struck for local use in the late 16th century and again about the time of the Peace of Westphalia (1648-50).

RULERS

ANKLAM

Anklam was a town in the duchy of Pomerania (Pommern) situated on the Peene River, 5 miles (8 kilometers) from the Baltic Sea coast and 27 miles (45 kilometers) northeast of Neubrandenburg. It was founded as a fortress by the Slavs, but gained rights as an important town and became a member of the Hanseatic League. Anklam bought the right to produce its own coinage from the duke in 1325 and began striking a series of small silver coins. After the dissolution of the Pomeranian provincial diet in 1622, during the Kipper Period of the Thirty Years' War, Anklam countermarked the minor silver coinage which circulated from other nearby states in its local region. The town came under Swedish rule in 1648, but was taken by Brandenburg-Prussia in 1676. Except for a short period in the early 18th century, it remained part of Prussia.

ARENBERG

A small principality with lands between the present-day Belgian border and the Rhine, west of Koblenz. The earliest lords of Arenberg are mentioned in the 12th century. The title and lands passed in marriage to the countship of Mark from where a new line of Arenberg lords began in the 14th century. At the end of the 15th century branch lines were founded in Sedan, Lumain and Roche-- fort. The male line of Arenberg became extinct in 1541 and passed by marriage to Ligne-Barbancon in 1547. The new line was raised to the rank of count in 1549, to prince in 1576 and to that of duke in 1644. The right to mint coins was granted in 1570. Philipp Franz issued Arenberg's only 17th century thaler. The lands on the left bank of the Rhine were lost to France in 1801 and the remaining possessions were mediatized in 1810.

RULERS

Karl, 1568-1616, prince 1576

AUGSBURG

Founded in the late 9th century in the city of Augsburg, the bishopric eventually extended as far as the Bavarian frontier on the north and east, to Tyrol on the south and to Upper Swabia on the west. The earliest episcopal coinage dates from the mid-10th century and issues continued through each of the next eight and one-half centuries. The bishopric was secularized in 1803 and was absorbed by Bavaria.

FREE CITY
Founded by the Romans about 15 B.C. and named Augusta Vindelicorum in honor of the Emperor Augustus, the city was the site of a German imperial mint for several centuries from about the year 1000. In 1276, Augsburg was made a free imperial city, but did not receive the right to strike its own coins until 1521. Earlier date issues were produced under the office of the Imperial Chamberlain, as listed above. Augsburg's coinage came to an end in 1805 and the city followed the bishopric into Bavarian envelopment in the following year.

BADEN

The earliest rulers of Baden, in the southwestern part of Germany along the Rhine, descended from the dukes of Zähringen in the late 11th century. The first division of the territory occurred in 1190, when separate lines of margraves were established in Baden and in Hachberg. Immediately prior to its extinction in 1418, Hachberg was sold back to Baden, which underwent several minor divisions itself during the next century. Baden acquired most of the Countship of Sponheim from Electoral Pfalz near the end of the 15th century. In 1515, the most significant division of the patrimony took place, in which the Baden-Baden and Baden-(Pforzheim) Durlach lines were established.

ARMS
Baden – diagonal bar from upper left to lower right
Sponheim – checkerboard
The usual arrangement is 4-fold arms of Baden quartered with Sponheim.

REFERENCE
W = Friedrich Wielandt, **Badische Münzen- und Geldgeschichte**, 3rd edn., Karlsruhe, 1979.

BADEN-BADEN LINE

Margraviate

Established in 1515 by Christoph I's eldest son, Bernhard III. This branch was often at odds with the rulers of the younger Baden-Durlach line because of religious differences resulting from the Protestant Reformation. When Baden-Baden finally became extinct in 1771, all lands and titles reverted to Baden-Durlach and all of Baden was reunited after a split of more than 250 years.

RULERS
Wilhelm, 1622-1677
Ludwig Wilhelm, 1677-1707

ARMS
Baden – diagonal bar from upper left to lower right
The usual arrangement is shield of 4-fold arms of Baden quartered with Sponheim

BADEN-DURLACH LINE

Grand Duchy

Although Baden-Durlach was founded upon the division of Baden in 1515, the youngest son of Christoph I did not begin ruling in his own right until the demise of his father. This part of Baden was called Pforzheim until 1565, when the margrave moved his seat from the former to Durlach, located to the west and nearer the Rhine. After the male line of Baden-Baden failed in 1771 and the two parts of Baden were reunited, the fortunes of the margraviate continued to grow. Karlsruhe, near Durlach, was developed into a well-planned capital city. The ruler was given the rank of elector in 1803, only to be raised to grand duke three years later. The monarchy came to an end in 1918, but had by this time become one of the largest states in Germany.

BAMBERG

The bishopric was founded in 1007 by Emperor Heinrich II (1002-24) in the town of Bamberg, 32 miles (53 kilometers) north-northwest of Nürnberg. The bishops began issuing their own coinage almost from the beginning and were given the rank of Prince of the Empire by the emperor about 1250. The bishopric was secularized in 1801 and was incorporated into Bavaria the following year.

RULERS
Johann Philipp von Gebsattel, 1599-1609
Johann Gottfried von Aschhausen, 1609-1622
Johann Georg II, Fuchs von Dornheim, 1622-1633
Franz, Graf von Hatzfeld, 1633-1642
Melchior Otto, Voigt von Salzburg, 1642-1653
Philipp Valentin, Voigt von Rieneck, 1653-1672
Peter Philipp von Dernbach, 1672-1683
Marquard Sebastian, Schenk von Staufenberg, 1683-1693
Lothar Franz, Freiherr von Schönborn, 1693-1729

ARMS
Lion rampant left over which superimposed a diagonal band from upper left to lower right.

MINT MARKS
B - Bamberg Mint
F - Fürth Mint

MINT OFFICIALS' INITIALS

Initials	Date	Name

BARBY

A small lordship located near the junction of the Elbe and Saale Rivers, about midway between Magdeburg and Dessau, founded in the early 13th century. The lord of Barby was a vassal of Saxony and was raised to the rank of count in 1497. The countship was divided in 1565, but only the main line of Barby and its successor in 1617, Barby-MŸhlingen, issued any coinage. Barby became extinct in 1659 and its lands passed to Anhalt and Saxe-Weissenfels.

RULERS
Wolfgang II, 1565-1615
Wolfgang Friedrich, 1615-1617
Albrecht Friedrich, 1617-1641
and Jost Günther, 1617-1651
August Ludwig, 1641-1659

BAVARIA

(Bayern)

One of the largest states in Germany, Bavaria was a duchy from earliest times, ruled by the Agilholfingen dynasty from 553 until it was suppressed by Charlemagne in 788. Bavaria remained a territory of the Carolingian Empire from that time until 911, when the son of the Count of Scheyern was made duke and began a new line of rulers there. A number of dukes during the next century and a half were elected emperor, but when the mail line became extinct, Empress Agnes gave Bavaria to the Counts of Nordheim in 1061. His descendant, Heinrich XII the Lion, fell out of favor with the emperor and was deposed. The duchy was then entrusted to Otto VI von Wittelsbach, Count of Scheyern and descendant of the counts who had ruled from the early 10th century. Duke Otto I, as he was known from 1180 on, was the ancestor of the dynasty which ruled in Bavaria until 1918 and, from the late 13th century, in the Rhine Palatinate as well (see Electoral Pfalz). The first of several divisions took place in 1255 when lines in Upper and Lower Bavaria were established. The line in Lower Bavaria became extinct in 1340 and the territory reverted to Upper Bavaria. Meanwhile, the division of Upper Bavaria and the Palatinate took place and was confirmed by treaty in 1329, although the electoral vote residing with the Wittelsbachs was to be held jointly by the two branches. In 1347, Bavaria and all other holdings of the family in Brandenburg, the Tyrol and Holland were divided among six brothers. Munich had become the chief city of the duchy by this time. In 1475, Duke Stephen I, who had reunited most of the family's holdings in Bavaria, died and left three sons who promptly divided their patrimony once again. The lines of Ingolstadt, Landshut and Munich were founded, but as the other lines died out, the one seated in Munich regained control of all of Bavaria. Duke Albrecht IV instituted primogeniture in 1506 and from that time on, Bavaria remained united. When Elector Friedrich V of the Palatinate (Pfalz) was elected King of Bohemia in 1618, an event which helped precipitate the Thirty Years' War, Duke Maximilian I of Bavaria sided with the emperor against his kinsman. The electoral dignity had been given to the Pfalz branch of the Wittelsbachs by the Golden Bull of 1356, a fact which was a source of contention with the Bavarian branch of the family. With the ouster of Friedrich V, Maximilian I obtained the electoral right and control of the Palatinate in 1623, then also ruled over the Upper Palatinate (Oberpfalz) from 1628 until the conclusion of the war and the Peace of Westphalia. The Bavarian Wittelsbachs became extinct in 1777 and the line in Electoral Pfalz acquired Bavaria, thus uniting the two main territories of the dynasty under a single ruler for the first time since the early 14th century. When Napoleon abolished the Holy Roman Empire in 1806, bringing an end to the electoral system, the ruler of Bavaria was raised to the rank of king. The 19th century saw tragedy upon tragedy visit the royal family. Because of his opposition to the parliamentary reform movement, Ludwig I was forced to abdicate in 1848. His grandson, Ludwig II, inspired by his upbringing to spend his fortune building the fairy tale castle of Neuschwanstein, was forcibly removed by court nobles and died under mysterious circumstances in 1886. His younger brother, Otto, was declared insane and the kingdom was ruled by his uncle, the beloved Prince Luitpold, as prince regent. Ludwig II, the last King of Bavaria, was forced to abdicate at the end of World War I.

RULERS

Maximilian I, 1598-1651
Ferdinand Maria, 1651-1679
Maximilian II, Emanuel, 1679-1726

BEESKOW

A provincial town on the River Spree in Brandenburg-Prussia, about 43 miles southeast of Berlin. Beeskow is mentioned as early as 1185 and came under the control of the lords of Strele in the second half of the 13th century. It passed through the possession of several local noble families before its final acquisition by Brandenburg in 1571. The Elector of Brandenburg permitted a local copper coinage during the inflationary period at the beginning of the Thirty Years' War.

BENTHEIM-BENTHEIM

The countship of Bentheim was located on both sides of the Vechte River along the border between the Netherlands and Westphalia. The lords of Bentheim were descended from an eleventh-century marriage alliance of the countships of Holland and Nordheim. Tecklenburg was obtained through marriage in the middle of the 13th century with a separate line being founded in 1269. In 1454, Bentheim was divided into the lines of Bentheim-Bentheim and Bentheim-Steinfurt. The latter was a territory located about midway between the county of Bentheim and the city of Münster in Westphalia. The various divisions were reunited by marriage during the 16th century only to be divided again into five lines in 1606. By family agreement (1691),

the heirs to the two lines of Bentheim-Bentheim and Bentheim-Steinfurt exchanged their counties and titles in 1693. Bentheim-Bentheim became extinct in 1803, when the last count died, but he had already ceded Bentheim to Hannover in 1753. It passed to Berg in 1806 and then to Prussia in 1813. Bentheim-Steinfurt was mediatized in 1806, but the count ¦was raised to the rank of ¦prince in 1817. The counts of Bentheim-Steinfurt did not issue any coinage, rather allowing that of Bentheim-Bentheim to circulate in their territory.

BENTHEIM-TECKLENBURG-RHEDA

The countship of Tecklenburg was located about halfway between the cities of Münster and Osnabrück in Westphalia and was acquired by Bentheim through marriage during the first half of the 13th century and the separate line of Bentheim-Tecklenburg was founded in 1269. The lordship of Rheda, to the southeast of Tecklenburg, was acquired by marriage in the mid-14th century. After the reunification of the 16th century, a new line of Bentheim-Tecklenburg-Rheda was founded in 1606. The county of Tecklenburg was lost to Solms in 1696, then sold to Prussia in 1707. Rheda was mediatized in 1805.

BERLIN

Located on the River Spree, Berlin was settled in the 12th century. It grew to become a major city and the capital of the margraviate and electorate of Brandenburg (see). It later was capital of the Kingdom of Prussia and finally, of the German Empire of 1871-1918 and the German Republic until 1945. Local coinage was struck for Berlin in the early period of the Thirty Years' War.

BESANCON

Besançon is located in Franche-Comté, 70 miles (116 kilometers) southwest of Mühlhausen in Alsace and almost the same distance west-northwest of Bern, Switzerland. This city was well known in Roman times as Vesontio and was first occupied by Julius Caesar in 58 B.C. An archbishopric was founded here in the 2nd century. The archbishops became princes of the empire ca.1288.The city became a free imperial city in 1184 and soon came under the influence of the dukes of Burgundy, then of the imperial Hapsburgs and later within the Spanish sphere of influence after the abdication of Emperor Charles V in 1556. In 1678 it was formally ceded to France by the Peace of Nijmegen.The normal devices employed on the city coinage are the city arms and a bust or figure of Emperor Charles V, even long after his death, because it was he who gave Besançon the mint right in 1526 and renewed it in 1534.

ARMS

Eagle, head to left, between two columns.

BRANDENBURG

(Brandenburg-Prussia)

The territory which was to become Brandenburg was inhabited by various Slavic tribes in the early Middle Ages. Charlemagne managed to diminish their power to some extent, but they regained their control after his passing. The Slav capital at Brennibor was captured by Emperor Heinrich I (918-36) and from that place Brandenburg takes its name. A series of margraves more or less continued to press the Slav tribes, but some were so ineffectual that the Slavs regained much of their former domains, especially after the death of Emperor Otto I (973). The early 12th century saw the return to active warfare against the Slavs. In 1134, the conquered lands were divided into the Altmark (Old or North Mark), west of the Elbe River, the Mittelmark (Middle Mark), between the Elbe and the Oder, and the Neumark (New Mark), east of the Oder River. Duke Lothar of Saxony appointed Albrecht the Bear of BallenstŠdt as Margrave of the Nordmark (Altmark) and his long reign until 1170 brought stability to the lands under his control. The Ascanian rulers consolidated their power in Brandenburg and eventually obtained the electoral dignity in the 13th century. When the dynasty in Brandenburg became extinct, title passed to Emperor Ludwig III of Bavaria (1314-47), who made his eldest son ruler there. The margraviate continued to be ruled by members of the various imperial families or their appointees until the early 15th century. The Hohenzollerns of Swabia, who had been hereditary burgraves of NŸrnberg since the late 12th century, acquired a mortgage on Brandenburg from the perpetually impecunious Emperor. In a stroke, Friedrich VI of Nürnberg became Elector Friedrich I of Brandenburg in 1415, thus placing the family into position to become rulers of the future most powerful state of the Empire.

Several of the Electors' sons ruled in the Hohenzollern possessions of Franconia (see Brandenburg in Franconia) and two founded the lines of Brandenburg-Ansbach and Brandenburg-Bayreuth (which see). Elector Johann Sigismund inherited the Duchy of Prussia in 1618 and the electorate was known henceforth as Brandenburg-Prussia. The Electorate sided with the Protestant cause during the Thirty Years' War, having submitted to the Reformation in 1539. The lessons of the war brought about the build-up of military power and territorial expansion under Friedrich Wilhelm, the Great Elector, which formed the basis of the Hohenzollerns' rise as a leading power in Europe. Johann Sigismund's great grandson assumed the title of King in Prussia in 1701 and the old margraviate of Brandenburg became just a province of the Kingdom. See Prussia for subsequent history and coin issues.
